GREAT RACES AT NAPANEE, DOMINION DAY

DAYSPRING 2.07¼, and ROMALA 2.07¼, WILL RACE IN THE FREE-FOR-ALL FOR $500.

These two horses have won the fastest Free-For-All races in Canada this year. This will be a sensational race and the fastest ever raced in Napanee.

THE 3-MINUTE CLASS for $200.00 has 10 horses entered.

THE 2.30 CLASS for $400.00 has 5 horses entered.

THE 2.17 CLASS for $400.00 has 5 entries.

This is the largest bunch of horses that Napanee has had for years and some splendid racing is assured.

THERE WILL BE 3 GAMES OF BASEBALL.

10.30 a.m., Mohawk Reserve and Adolphustown.

1 p.m., Tamworth and Napanee.

3 p.m., Verona and Picton. Verona won the championship of Frontenac County last year and Picton won the Bay of Quinte league.

The Steamer Brockville will run an excursion from Picton.

There is no charge for cars. Bring along your lunch and camp at the finest park in Canada.

TOWN COUNCIL MEETING

Council Chamber,
Napanee, June 21st, 1921.

The regular meeting of the Council was held in the Council Chamber on Tuesday night.

Members present—Mayor Graham, Reeve Boyes, Councillors Paul, Roblin, Hartman, Ming, Steacy and Wilson.

The minutes of the last regular meeting were read and approved of.

A communication was read from the Hydro-Electric Commission, advising the Council that the Napanee Gas Plant would be operated until the end of August.

Wm. Pearson waited on the Council in reference to compensation for injuries his child received from falling into an excavation on Dundas St. East.

Left to Streets and Finance Committee to interview Mr. Pearson with regard to amount of compensation and report to the council at next meeting.

Chairman Roblin, of the Streets Committee, wanted the opinion of the members of the Council regarding the purchase of another car of road oil.

Moved by Coun. Hartman, seconded by Coun Paul, that the Council order five barrels of oil to patch up Centre and John Streets. Carried.

On motion it was decided that one sprinkler could be dispensed with. Mr. Powell was retained to operate the other sprinkler.

A deputation of the property owners along Dundas Street waited on the Council to protest against a special levy on their property for the paving of Dundas Street. The following petition was presented:—

To the Mayor and Council of the Town of Napanee.

We, the undersigned property owners, whose property abuts on Dundas Street in the Town of Napanee, which said property will be burdened with an excessive local tax, if the proposed manner of raising money to pay for paving said Dundas Street is carried out, we would therefore humbly beg your honorable body that the money to pay for the proposed street paving be raised by a general tax, and we your petitioners would ever pray.

Signed by Bertram F. Hawley and seventy others.

Mr. Bertram F. Hawley was spokesman for the delegation in presenting the petition, pointing out that the pavement was essential for the work to connect the Provincial highway through Napanee, and as such should be constructed by the whole town, and he was of the opinion that had a vote been taken the road would never have been built, and that the burden on the property holders was out of proportion to the benefits received.

The Mayor replied, stating that due notice had been published in the local papers of the proposed building of a cement roadway on Dundas Street, giving the 3-5 rate per frontage to the property holders. Those who were protesting had months to study the matter up, but the Council heard no word of complaint. He could not conceive of such an exhibition of hostility to the construction of the road, or what was the motive, especially when the work was well under way and could not be discontinued. The property owners were only assessed a little over one-half what they would otherwise have to pay if it was not for the Provincial assistance, and to get this grant the work would necessarily have to be done this year. The Council again met and entered fully into the matter of building this roadway. They had given it long study, had consulted expert engineers, had taken into account the expenditure of $3000 a year to keep the road in shape for traffic, which would be only a make-shift at best and the only conclusion to be arrived at was the building of a permanent cement roadway, which would cost no more than a patched up road over a period of twenty years. Not one citizen, the Mayor said, either on Dundas Street or any other part of the town, to whom he had spoken, but said, "Go ahead with the roadway."

The delegation was informed that the Council will not act on their petition. The road will be built in accordance with the provisions of the by-laws, and those who objected to the assessment could appeal to the Court of Revision of the Council at the proper time. Failing that, the County Judge, and finally the Railway and Municipal Board.

The members of the Council spoke in justification of their action and claimed before the roadway was started had heard no dissenting voice.

Several property owners spoke protesting against the high-handed manner as they called it, in which the Council had acted in paving ahead with the roadway, but from their remarks it was clear that it was not the cement roadway they objected to, but the cost per foot against their property.

One petitioner wanted to know why he should have to pay for a cement road for the benefit of 10-ton trucks and automobiles? Why did not the Council put the tax on automobiles that would run over the road, instead of on the property holders?

The Mayor replied that to inaugurate the system of raising revenue, toll gates would have to be erected and archives dug up to get methods of operaton adopted by the ancients.

ACCOUNTS.

The following accounts were ordered paid:—

W. D. Midmer	$ 43 63
J. M. Graham	15 25
Madole Hardware Co.	79 94
W. H. Foster	1 40
Templeton & Son	28 62

Council adjourned.

WILTON.

The Community Club at Wilton which has had five successful years of service, under the leadership of the Rev. W. J. Parsons, closed its fifth session on Thursday last. The committee were able to make the following disbursements of monies on hand: Twenty-five dollars to the China Famine Fund, forty-six dollars to the Wilton war memorial for the purpose of erecting an ornamental fence behind the monument. The committee expressed their regret that the Rev. W. J. Parsons was leaving their community, at the same time they wished him every success in the pioneer work which he is taking up in British Columbia.

DEN

Albert and Sa[m] Warlich and their sisters [Re]sca and Lucy, of Vanburgh, [Ja]mer Denbigh boys and gi[rls] de an auto trip to their old [ho]here and enjoyed about a [we]renewing old acquaintances a[nd] visiting relatives and [fr]neighbors. Herbert Warlich [ac]panied them home and pa[id] visit to his uncle, Emil Warlich [an]d family at Vanburgh. [Th]cousins, William and Louis[e] Warlich and Miss Jennie Ball [al]o motored there and made a [re]turn visit. Another cousin, [Ga]Vanburgh, Vanburgh, Gustave Warlich, is now engaged here [as] carpenter work for several [re]sidents of our village.

Mrs. H. Fritsch and baby went to Ottawa to consult a specialist about some ailment from which the latter is suffering and Miss Bertha Stein went [to] visit her sister, Mrs. G. M[e]rkel, and family.

Mr. and Mrs. Victor Wienecke and baby, of Tweed, are enjoying a few days visiting their parents and other relatives here at their old home.

Mrs. A. Armstrong, of Tweed, is a welcome guest of her parents, Mr. and Mrs. Wm. Warlich, Sr.

The Misses Margaret Adam and Anna Stein, students of Renfrew High School, have arrived to enjoy their summer vacation with their parents here.

Denbigh village and vicinity is making some progress this season. A direct telephone service is being established now between here and Lavant Station and a Continuation School is to be started on the first day of September next.

Hay for rope and cesain at right prices at WILSON'S HARDWARE.

CAMDEN EAST.

The enumerator has been around the village the past week taking the census.

Mrs. James Skinner attended the funeral of her brother, Jas. Gallagher, Frankville.

A baseball game was played on Thursday last between Enterprise and Camden East, the score being 10-6 in favor of the home team.

William Loucks spent over Sunday with his wife, returning to Parham on Monday.

R. J. Glover is working at Harrowsmith.

A pleasant event took place at the home of Mrs. Williams, the occasion being the [illegible] pie plate by the Sunday School of Camden East Methodist church. Rev. (Dr.) Huxtable, Newburgh, she being a former member of the choir. A pleasant evening was spent by all with music and games, after which refreshments were served.

Mr. and Mrs. Clifford Skinner and two children, Toronto, are spending their holidays with his parents, Mr. and Mrs. James Skinner.

The baseball team went to Switzerville and played their team on Monday evening, the score being 23 to 11 in favor of Camden East.

Born, on Sunday, June 19th, to Mr. and Mrs. Hayes, a son.

The parlor social given by the W.C.T.U. of this place at the home of Mrs. J. W. Perry was well attended. Several eloquent speakers were present.

Mr. and Mrs. R. W. Saul visited at Mr. Rooke's, Sharp's Corners, recently.

Mrs. Reeves Comfort has returned home after spending the past month with her parents, Mr. and Mrs. Gould, at Carthage.

Mr. and Mrs. Fred Wales and children, Switzerville, visited at George Riley's, recently.

The remains of the late Wm. Shane, Kingston, and the late Henry Darlington, Point Anne, were interred in the family plots in the Anglican church cemetery.

Robert Coulter, of Sterling, was in the village for a few days.

All are sorry to hear of the accident that happened W. McWilliams. He was repairing the track in the barn and by some means he fell, and having hold on the rope, he pulled the car and fork off the track. The fork went through his leg below the knee. Dr. Simpson dressed the wound and put nine stitches in it.

Peter Hogeboom, Watertown, is visiting his uncle.

LAST DAY AT CHAUTAUQUA

Miss Ruby Gall and her Old Song Singers will present two delightful programs Thursday, the last day of Chautauqua. This talented mixed quartette will feature the old familiar songs. In the afternoon program they will present some of the best known classics. Their evening program will be given in costume and by candle light. The program will consist of a great variety of the old tunes so well liked by both old and young. This will undoubtedly be one of the most popular programs of the entire series.

Dr. Herbert Norwood, the eminent Canadian divine, will lecture both afternoon and evening of the last day. Dr. Norwood for many years served an influential church in Ontario, but is now pastor of one of the largest and most representative congregations in the States. Not only is Dr. Norwood a forceful and an eloquent speaker, but he is regarded as one of the well-known Canadian poets. His afternoon lecture is entitled "Modern Canadian Poets." In the evening he will give as his lecture "The Dominion and Its Destiny." This is without question the great lecture of Chautauqua week. The last day programs certainly deserve to be well patronized.

THE FILLION CONCERT PARTY AND DR. POOLE

TO APPEAR AT CHAUTAUQUA TUESDAY.

Each year the Chautauqua management at Toronto has put forth a special effort in securing real musical artists for the Chautauqua program. Last year the management secured a leading concert singer from Chicago, but this year they found it was not necessary to leave Toronto to find a company of the continent's leading musicians. Ferdinand Fillion has been hailed by leading critics everywhere as a master violinist. The tonal qualities of his playing and his technique display inherent musical tendencies and years of training. Fern Goltre Fillion holds a leading place among the great sopranos of the Dominion. Harvey Robb, the capable and well-known Toronto pianist, is the third member of the artist trio, which will appear both Tuesday afternoon and evening.

Mr. Coit, of the Coit-Albee Bureau, spent the last winter in establishing lyceum and Chautauqua in England. While there he heard a wonderful illustrated lecture in Philharmonic Hall. Ever on the look-out for an attraction that would surpass the Mildred Legge Clemens lecture of last year, Mr. Coit realized that he had found the object of his search. Dr. Frederick Poole will, as a lecturer, present one of the most spectacular entertainments ever given on the platform. Not only is Dr. Poole a very eloquent lecturer, but he presents a series of beautifully colored slides and moving pictures depicting the triumphs of Allenby in Palestine and Lawrence in Arabia. These two achievements represent the two most romantic phases of the great war and are authoritatively and accurately described and pictured in Dr. Poole's lecture Tuesday night. His remarks are all based on actual experiences. He has a neat wit with which he enlivens his discourses; and when, as occasionally occurs, the tense interest of the thrilling epic slackens for a moment, his little anecdotes bridge the gulf capitally. Dr. Poole will also deliver a short lecture entitled, "China, Ancient and Modern." Tuesday's programs will rank with the best ever presented in Napanee and merit an overflow attendance.

WEDNESDAY'S PROGRAM AT CHAUTAUQUA

Everybody is urged to have a rest Wednesday afternoon in preparation for the great play Wednesday night. Percy Winchan, who pleased so much two years ago, in his appearance in "Seven Keys to Baldpate," will again appear in company with his company in "It Pays to Advertise." This comedy as one of Geo. M. Cohan's greatest laugh producers and with Percival Vivian in the leading role, will undoubtedly be a sensation. Several extra chairs and benches will be placed in the Chautauqua tent in an attempt to accomodate the crowds, but we advise you to go early nevertheless and be assured of a good seat. No one in the community will want to miss this big event, especially since we are privileged to hear and see so few really good plays

A new line of hammocks, very useful this hot weather, at DAVY & ALLISON'S.

ROBLIN.

The Methodist Church was well filled on Sunday evening, it being the re-opening service.

Rev. and Mrs. Wilson returned from conference on Friday, bringing with them their little granddaughter, Evelyn.

Mr. and Mrs. W. Powers have purchased a new Ford runabout.

Mrs. D. Gilmour, Tamworth, spent the past week with her sister, Miss Ellen Kimmett.

Mrs. Gordon Sally, by Mr. O'Brien, was well attended in the Orange Hall on Tuesday evening last. Mrs. Powell, of Napanee, entertained the audience with music and recitations.

A number from here are attending the Chautauqua at Napanee this week.

Mrs. Grant Cooke, Selby, spent last week with her parents, Mr. and Mrs. A. McCutcheon.

Mr. and Mrs. H. Paul and little son, Billie, spent a couple of days last week in Kingston.

Mrs. Frank McConnell, Sr., was the guest of Mrs. Dan Richmond on Friday.

Mrs. Percy Vine, Napanee, returned home on Saturday, after spending the week with relatives here.

The following are writing on Group 2 this week: Jean Paul, Muriel Hart, Edna McCutcheon, Laura Hughes, Tommy Wicklam and Hubert McCracken.

Rev Roy Schermerhorn and family left on Wednesday for his circuit at Rundell, Quebec.

Miss M. Roberts, our school teacher, left on Monday for her home at Kingston.

Mrs. Carleton Woods is spending the week at Napanee and attending the Chautauqua.

Mr. Gerald Hill spent Sunday evening at Mr. C. E. Kimmett's.

The Market Grocery.

Fresh groceries in each week. The highest grade in coffee and tea. Powdered whole milk—a small amount makes a glass of rich milk. Flowers and vegetables plants. We expect a limited number of moonlowers this week. The largest sizes in pineapples, fresh this week.

Screen doors to fit any house. Window screens to fit any window. DAVY & ALLISON.

FLAVOUR —the charm of "SALADA" TEA

is in its unique flavour of rich delicacy. And it never varies. All grocers sell "Salada" in sealed metal packets only. B836

FARMERS!

If you require money to raise more livestock, our local manager will be glad to talk the matter over with you.

Beef, hogs, butter and cheese are big money producers. Are you getting your share of the profits from them?

COUNTY COUNCIL

County Council met in regular session in the Council Chamber in the Court House on Tuesday afternoon, Warden Samuel Miller presiding.

Present—Reeves A. C. Tummon, J. Hannah, J. H. McNeely, F. S. Boyes, J. B. Elliott, Jesse Johnston, Elmer Alkenbrack, R. W. Kimmerly, W. J. Young, W. C. T. Loyst, J. B. Hawley, and Deputy-Reeves F. A. McDonald and John Kenny.

Rev. Mr. McRae, Amherst Island, opened the session with prayer.

County Clerk Wilson presented to the Council the accounts from the Provincial Highways Department for construction work on Highway in 1920. Total cost construction $173,846.84, total maintainance $20,146.94; the County's share of expenditure $38,798.76. Referred to Roads and Bridges Committee.

A communication from the Highways Department, stating that the road leading from Croydon turn north to Addington road had been accepted as a County road and Ordern-Council would be forwarded in due course.

The report of the Joint Committee of Lennox and Addington and Hastings, re Kingsford bridge, was presented.

The Committee reported that the Joint Committee had met at the bridge, and recommended that four I beams be placed on each bridge, size to be determined by Mr. Aylsworth. Report adopted.

A communication from the Provincial Highways Department, re County Provincial roads, was referred to the Roads and Bridges Committee.

The report of the Warden and Clerk re orders on Treasurer, was referred to the Finance Committee.

Council adjourned for a short time in order that the Joint Roads and Bridges and Finance Committee might meet.

Mr. Hannah presented the first report of the Roads and Bridges Committee, re report of Provincial Engineer re County Provincial roads and meeting with Hon. Mr. Biggs in Toronto. Report adopted.

A resolution that construction work on County Provincial roads be in accordance with Provincial regulations as to widening right of way to 66 feet, draining and grading, but that metalling be only sufficient to carry traffic, and that a copy of the resolution be forwarded to the Minister of Public Works. Carried.

The Hamburgh road was cited as an instance where widening and ditching was very much needed.

The County Clerk was authorized to telephone Mr. Purdy, Treasurer Frontenac County, re trip over New York state roads.

A report from Roads and Bridges Committee, stating that Hastings County was willing to expend $1000 on Kingsford road, and recommended that Lennox and Addington appropriate an equal amount, $1000.00, chargeable to Richmond road appropriation. Report adopted.

A report from the Chairman of Roads and Bridges and County Road Superintendent, re work being done on the Provincial road, Newburgh road, also repairs necessary on certain bridges and roads. Report was adopted.

Warden Miller reported in reference to the deputation to Ottawa in reference to the establishment of a ferry from Amherst Island to Millhaven.

Council adjourned.

Wednesday Morning.

Minutes of Tuesday afternoon were read and on motion adopted.

On motion the Road Superintendent was authorized to place sign boards on dangerous turns on County roads, warning motorists to go slow at these points.

The Napanee Board of Education presented its annual requisition for Napanee Collegiate Institute, asking $6580.79 as County's share of maintainance. Referred to Education and Printing and Finance Committees.

Newburgh Board of Education presented requisition for Newburgh High School, $4647.40. Referred to Education and Printing and Finance Committees.

Tamworth Continuation School presented requisition for $1753.97, as County's share of maintainance. Referred to Education and Printing and Finance Committees.

An application from the National Sanitarium Association for aid. Laid on table.

A communication from the Ontario Municipal Association, asking the County to join the Association. Membership fee $10.00. Ordered filed.

A communication, re appointment of grant to Rural Public Schools, Government grant is $1243.10, County's share $1243.10. Referred to Finance Committee.

The Finance Committee presented a report of the recent issue of debentures for Highway construction, $30,000. Only one offer was received from a brokerage house at 96.61.

The Committee reported that all of the debentures were disposed of locally at par, and that the proceeds therefrom had been paid to the Provincial Government on Highways Department account.

The Committee recommended that a commission of one per cent. be paid the Committee for their services in selling the debentures. Report adopted.

The following accounts were ordered paid:—T. S. Henry, supplies, $20.25; Ontario Department Agriculture, account re school fairs, 94 schools at $3.00 each, $282.00; Jackson Press, re debentures, $43.28; E. J. Corkill, postage, $10.75.

Account, U. M. Wilson, transfer case, $6.77. Referred to Finance Committee.

Account, Davis & Coates, $20.20, was referred to County Property Committee.

Account, Dr. A. R. Williamson, Medical Officer, House of Refuge, $105.00, was referred to Finance Committee.

Account, Belleville Children's Aid Society, keep of County children, $203.25, less $135.75, paid March session, was ordered paid.

An account from S. S. Corbett, re burial of Miss Homan, $33.00, was ordered forwarded to Miss Homan's brother.

Account, Davy & Allison, Court House, $17.30, was referred to County Property Committee.

Account, W. E. Loyst, $8.50, was referred to County Property Committee.

An auto damage claim, from W. G. Jackson, $11.50; damages occurred on Selby road. No action taken.

Auto damage claim, from W. A. Martin, Yarker, $7.25. No action taken.

Council adjourned.

Clean to handle. Sold by all Druggists. Grocers and General Stores.

Wednesday Afternoon.

Mr. Carscallen, Tamworth, addressed the Council in reference to registration of Tamworth Continuation School and other school matters.

A vote of thanks was passed to Mr. W. J. Paul, M.P., expressing the regret of the Council at his serious illness; also the thanks of the Council be tendered Mr. Paul for his assistance to the recent deputations to Ottawa.

On motion the delegates to Ottawa in reference to Railway service and ferry dock at Millhaven, were granted $35.00 each for expenses.

Account, F. Ford, caretaker's supplies, $9.64, was ordered paid.

Account, Village of Newburgh, re conveyance of insane person to Rockwood hospital, $6.95, was ordered paid.

A letter from U. M. Wilson, C.C.A., requesting six transfer cases for Voters' Lists, cost $45.00, and express, was referred to Finance Committee.

A communication from National Sanitarium Association, was referred to Finance Committee.

A motion was presented by Messrs. Elliott and Tummon, that in view of the cost of the Provincial Highway, which does not benefit a number of the townships in any way, that the County as a whole build certain miles of County Provincial Highways benefitting these townships.

The motion was discussed at considerable length. The roads designated in the motion are the first six and a half miles of the Hamburgh road, the first six miles of the Newburgh road from Napanee to Newburgh, and that $6000 be spent on Hamburgh road and $5000 on Newburgh road.

The motion also gives the Municipalities of Newburgh, Bath, Kaladar and Denbigh a relative amount of road moneys as their assessment bears to the County Road expenditure.

Council adjourned.

Thursday Morning.

The motion to have the County take over certain County Provincial roads was voted on and declared lost.

Yeas and nays were called for, but on motion the consideration was deferred until Friday morning.

A motion was introduced to make a special grant of $6000.00 to the Hamburgh road.

A motion was introduced granting North Fredericksburgh an overdraft of $5,000 to be spent on Hamburgh road. Richmond an overdraft of $2,500, Camden an overdraft of $3,000, and Newburgh an overdraft of $300, to be spent on Newburgh road.

On motion the motions were laid over until Friday morning.

Thursday Afternoon.

On motion the Treasurer was authorized to pay $1200 to Township of South Fredericksburgh, being amount received from the Government as percentage of road expenditure advanced by South Fredericksburgh.

Mr. A. Rankin, M.P.P. for Frontenac, was present and addressed the Council on County road matters.

On motion the County Treasurer was authorized to pay Ernestown Township $400, Government percentage of money advanced by Ernestown for County road purposes.

The Finance Committee recommended payment of the account of Dr. Williamson. That communications re Provincial Highway, be filed. That no action be taken re request of U. M. Wilson, C.C.A., for additional files. That account of U. M. Wilson be paid. That application of National Sanitarium for aid be considered by the whole Council.

Report was taken up clause by clause. The clause in reference to Mr. Wilson's account was amended to read that the account be not paid. Amended report was adopted.

On motion $50.00 was granted the National Sanitarium Association.

A communication from the Secretary of Denbigh Continuation School, asking for the usual grant to Continuation Schools, and a special equipment grant, was laid on the table.

Account, Templeton & Son, $64.74, was referred to the Education and Printing Committee.

Account, E. J. Pollard, $123.82, was referred to Education and Printing Committee.

Account, Boyle & Son, gaol, $24.69, was referred to County Property Committee.

Jos. Donat, stationery for Treasurer, $23.69, was ordered paid.

Account, Victoria Industrial School, $91.50, was ordered paid.

Account, Belmont Industrial Refuge $50.00, was referred to Finance Committee.

County Treasurer, postage, $21.00, was ordered paid.

County Clerk, contingencies, account, $30.19, was referred to Finance Committee.

A notice of motion to repeal By-law assisting the Town of Napanee in paving Dundas street, was introduced.

A motion granting North Fredericksburgh an overdraft of $6000, to be spent on Hamburgh road, and the balance of unappropriated County Road money, $6,346, be divided as usual under section 2 of By-law.

Further discussion was deferred until Friday morning.

A motion allowing the Township of Richmond to advance money to be spent on County Provincial roads, and guaranteeing to the Township the return of the Provincial subsidy, was passed.

Council adjourned.

Friday Morning.

The minutes of Thursday were read and approved.

The resolutions, re Hamburgh road, Newburgh road and other road matters, which were laid on the table until Friday morning, were taken up, and further discussion took place in reference especially to the Hamburgh road. It was pointed out that the road is in a deplorable condition, and a principal discussion was the furnishing ways and means of repairing the road. An overdraft of $6000 to North Fredericksburgh was finally agreed to, Kaladar township objected to receiving any portion of the grant and wanted a straight grant on the road taken over by the County as a whole. The Clerk explained that Council that a special grant could not be voted to any township except on County roads.

The motion was then taken up and all declared for it on one motion.

On motion $2,000 additional was appropriated to County Roads.

A motion to spend $6000 on the Hamburgh road was introduced by Mr. Johnston, seconded by Mr. Boyes, same to be considered as a special grant, provided the Department of Highways approves the grant. The motion was declared lost.

Mr. Boyes asked for the yeas and nays.

Yeas—Messrs. Boyes, Alcombrack, Elliott, Johnston, Miller and Tummon —6.

Nays — Messrs. Hannah, Hawley, Irish, Kimmerly, Loyst, McDonald, McNeilly, Young—8.

On motion the Township of Kaladar was granted an overdraft of $500, to be spent on County road, and that the Township receive its percentage on any money advanced by the township for expenditure on County roads.

Friday Afternoon.

Messrs. Adams and Woods, and the Secretary of the County Mothers' Allowances Board, addressed the Council in reference to matters in connection with the Board, and asked for some remuneration for their services during the past eight months.

Mr. W. A. Martin, Yarker, wrote the Council regarding his claim for auto damages, letter ordered filed.

A motion to credit to municipalities the difference between 40 per cent. government grant on County roads and the 60 per cent. paid on County Provincial roads, was declared lost.

An account from E. B. Miller, re taking a man named Smith to Kingston Hospital, $10.00, and Dr. Stratton's account, $10.00, were ordered paid.

Account, Municipal World, $15.94, was ordered paid.

Account, J. H. Oldham, M.D., $1.50, for services rendered a man named Babcock, working on County roads, was filed.

Pay list, Village of Bath, re roads, $573.70; pay list, Amherst Island, re roads, $436.75, and Pay list, Newburgh, re roads, $806.20, were ordered paid and charged to County Roads accounts of those municipalities.

On motion the motion allowing an overdraft on County Road account of $5000.00 to Ernesttown Township, was rescinded, providing Floating Bay bridge be not built this year.

A motion to add $100.00 to the grant to Ernesttown Agricultural Society, was lost.

A motion to add $50.00 to Ernesttown's grant was carried.

A motion by Messrs. McDonald and Loyst, to equalize the County Road system, all excess expenditure to be paid by the various townships.

A motion that the Finance Committee report on the matter at the November session, was passed.

The Roads and Bridges Committee were appointed to bring in above report.

An account from Frank Jackson, re road work in Ernesttown, $6.00, was ordered paid.

A motion was passed authorizing the County Road Superintendent to expropriate any lands necessary to widen County or County Provincial roads.

On motion North Fredericksburgh road account was granted $2000.00 on overdraft for expenditure on Hamburgh road.

Mr. Boyes asked for the yeas and nays.

Yeas — Messrs. Elliott, Hannah, Hawley, Irish, Kenny, Loyst, McDonald, McNeilly, Miller, Tummon and Young.

Nays—Messrs. Alcombrack, Boyes, and Johnston.

Inspector Corkill appeared before the Council to explain certain school matters.

A motion granting the Township of North Fredericksburgh the percentage retainable from the Government on the overdraft, was lost.

A motion was passed, expressing the sympathy of the Council in the illness of the County Treasurer, Mr. W. J. Shannon.

A motion to rescind the $20,000 overdraft for roads, was lost.

Council adjourned.

Mr. James Reid applied to Council to have the ground to the west of the Registry Office improved. The matter was referred to the County Property Committee, with power to act.

Council adjourned.

IMPROVED SEED.

The Dominion Department of Agriculture, through the Seed Branch, works in active co-operation with the provinces in the matter of improving grain and field seeds. Money is provided to pay prizes in standing field crop competitions, at seed fairs and provincial seed exhibitions, and in combined seed crop and cleaned seed competitions. The last named is a recent introduction. It has two distant phases, the first consisting of a standing field crop competition and the second of threshold and cleaned seed in which the seed produced from the fields of the first phase is judged in the granary of the competitor. The competitions must have at least fifteen entries in each, and the foundation seed used must be of approved origin. The minimum quantities of cleaned seed that competitor must be prepared to submit to quality for awards are: wheat, barley, peas, buckwheat and corn each 100 bushels, oats 200 bushels, field beans 25 bushels, clovers and timothy 15 bushels, and potatoes 150 bushels. The awards, except in the case of potatoes, are made on a basis of 65 per cent. on the bin score and 35 per cent. on the field score. In the case of potatoes the method is reversed, the award being based on 35 per cent. on the bin score and 65 per cent. on the field score. All agricultural associations are eligible to conduct these competitions, provided the association entering does not conduct a field crop competition in the same season with the same kind of crop. The prize money under subvention agreement the Dominion subscribes $200 in each instance and the province $100.

Children Cry FOR FLETCHER'S CASTORIA

EVERYBODY SEES A CHANGE IN FATHER

Grateful Son Says, His Father Looks Like Different Man Since Taking Tanlac.

"My Father has suffered from chronic stomach trouble for over twenty years and has paid out thousands of dollars for medicines and doctors," said G. W. Slaytin, a well-known Cobb County farmer, living a short distance out of Atlanta, Ga.

"We tried nearly everything, trying to cure him and he went off to the Springs, thinking maybe the water might help him but it just looked like nothing would reach his trouble. Then he tried dieting and lived on liquid food until he almost starved, but even that failed to do him any good and he just kept going from bad to worse.

"We tried nearly everything, trying to cure him and he went off to the Springs, thinking maybe the water might help him but it just looked like nothing would reach his trouble. Then he tried dieting and lived on liquid food until he almost starved, but even that failed to do him any good and he just kept going from bad to worse.

Then he tried dieting and lived on liquid food until he almost starved, but even that failed to do him any good and he just kept going from bad to worse.

"I don't guess there ever was a case as stubborn as his and if there ever was a confirmer dyspeptic he was one of them and I guess he would have been one yet if it hadn't been for this Tanlac.

"The first we heard of this medicine was when my Father saw an advertisement in the papers from parties he knew in Tennessee, who were friends of his and he knew what they said about it was the truth so he got it right away and began taking it. Well, sir, it acted just like magic—everybody noticed the change in Father. Why, he is just like a different man and sits down to the table and eats like a farmhand. Only yesterday he ate pork and turnips and ate so much we were actually afraid he was going to over-do the thing, but he and said nothing hurt him now and that he was hungry and expected to eat and make up for lost time.

"Now, when a medicine will do things like that I think people ought to know about it and I want to say right now that I would not give one bottle of Tanlac for all the other medicines and health resorts in the country put together."

Spending Time.

A French statistician has been dabbling with figures to find out just what man does with that precious thing called time. He concludes that at the age of fifty years the average man has slept 6,000 days, worked 6,500, walked 800, amused himself 4,000, spent 1,500 eating, and was ill 500 days.

China Cabinet in fumed finish, $29.85.

Every piece of Dining Room Furniture in our store has been reduced in price at least 20 per cent.

Discount of 30 per cent. on all Sideboards. One special Sideboard $27.65. Don't delay as the best values will soon be sold. June 31st is last day of the sale. Prices have been reduced in all lines of furniture.

VICTROLA RECORDS—New Records on the 1st and 15th of each month. A nice assortment of old ones always in stock.

GIBBARD'S RETAIL STORE
The Home of Good Furniture. Dundas Street, East.

Romantic Case and Its Sequel

THE coroner's jury of 1869 brought in a verdict of wilful murder.

In the hush following this announcement Ed. Davis, now an ex-alderman of Niagara Falls, and then a young man, slowly arose, and, with right hand upraised, said:

"Gentlemen of the jury! I thank you, but I will live to attend the funeral of every man of you and throw my handful of earth on your grave!"

He has kept his vow.

Fifty-one years have rounded up the toll of time and at the grave of every juryman Ed. Davis has stood and cast his handful of earth, as a grim token of his claim that he was not a wilful murderer of the negro Price. He has even lived to follow all but one of the crown witnesses to the tomb, a truly remarkable record.

And just a few weeks ago the coroner, Z. B. Lewis, who presided at the inquest, died in his 86th year at Niagara Falls. The passing of this well-known citizen snaps practically the last link, except the principal himself, Mr. Davis, with an almost forgotten tragedy of a half-century ago which at the time stirred Niagara Falls and of which the inquest cited above was the dramatic climax. Many old-timers, though, despite the lapse of more than 50 years, are still familiar with this bit of border history.

The story takes one back to near the close of a balmy day in June, 1869—in fact, a bit further back in order to touch the beginning of things incidental to this sketch. The scene was staged in what is now the Queen Victoria Niagara Falls Park, but was at that time known among the hackmen and bazaar touts as the "bank." In those days along this well-built-up and attractive midway there was keen rivalry among the curio merchants, hotelkeepers, and purveyors to all the points of interest. For years a bitter feud had existed between two of the most prominent men in daily life along the "bank." It owed its origin, perhaps, to their rivalry over the sight-seeing privileges and rights to conduct tourists "under" the Canadian falls. Saul Davis at that time conducted the original Prospect House bazaar, and later the Table Rock attraction, while Thomas Barnett was owner of the museum and zoological gardens. (In passing, it may be said of the latter institution that it afterwards passed into the control of the Davis family.) Both these men were in the pursuit of their business met and entertained people prominent in the world's eye, including royalty itself, and in their turn were held in high esteem.

Whatever the rights or the wrongs of the Barnett-Davis trouble it is not necessary to enter into. It is sufficient be it to outline the fact that one right of way under the bank was by a steep pathway in front of the museum, while the other mode of descent was by an enclosed spiral stairway under Table Rock to the foot of and back up the same stairway.

Well, the Davis stairway burned down. History does not leave any aftergiow on the subject. However, as the face of the shadow of it in the vicinity of the ruins for some time thereafter, owing, it was said to the heat of the fire, Davis put up placards warning the public against using the Barnett pathway. Alleged private interests kicked these signs of solicitude over the bank, and then there was war in and out of court, all of which became well-known local history.

A number of men—whites, coloured, and foreigners—acted as guides and runners for both factions, and small riots became a popular outdoor diversion from manual labor. One of these fights started from some cause or other on one bright June afternoon, in which Ed. and Bob Davis, sons of Saul Davis, became involved. The young men were driving past the museum, when hostile words were followed by a shower of rocks. Ed. Davis was struck on the head and knocked from the rig, the horse running away and carrying Bob, the younger brother, down the street in his mad flight. In the brief struggle that followed Ed. Davis, being the under man in a crowd, could not hope to win out against such odds. It was no uncommon thing at those days to carry a gun, and Ed. had one. He pulled and fired at the nearest man, who happened to be a negro named Price. He went down with a bullet through his body. Davis, cut and bleeding, held the crowd back until he reached his home. Price died just as he reached his own doorstep. Davis made no effort to evade arrest, and shortly after the shooting gave himself up to Police Chief Garner and was lodged in the county jail at Welland.

The inquest held before Coroner Z. B. Lewis, ended with a verdict of wilful murder, and the dramatic speech of Ed. Davis related at the beginning.

His honor the late Judge Gault presided at the trial of Davis for murder before the high court at Welland, and such legal lights of that time as D'Arcy McGee, the prosecuting attorney, D. Freelman, Judge Harris, J. C. Rykert, and J. Currie were arrayed on both sides. At the first trial the jury stood eleven for acquittal and one for conviction. The case was carried over till the fall assizes, when a verdict of not guilty was returned and Davis acquitted.

During a period of over thirty years Mr. Davis has served as alderman and filled other offices of civic honors in Niagara Falls.—D. H. Walthe, in Toronto Star Weekly.

DEER AMPUTATE ANTLERS.

Interesting Description of Growth and Shedding of Antlers of Stag.

A very distinguished Scottish surgeon, MacEwen, F.R.S., has followed up his work on the growth of bone by a study of the growth and shedding of antlers. To this the London Lancet devotes a long review, from which the following facts are condensed:

The antlers of the larger species, such as the elk, weigh more than all the bones of the body put together. The antlers are renewed every year, growing to full size within three or four months and falling off when the time for their usefulness is over. At each renewal they are covered with a temporary skin called the velvet, full of blood-vessels, nerves, lymphatics and glands. The speed with which these elaborate organs grow is one of the most remarkable phenomena in nature. Antlers, like all bones, are formed by special cells in the blood; these are called osteoblasts.

On the stag's frontal bone is a small centre of ossification. On this is pedicle forms, covered with cartilage, which, once formed, is a permanent structure, growing in circumference during subsequent years. Each year this pedicle sprouts, the cartilage growing out in advance until the full size of the antler is reached, when complete ossification takes place.

The antler first appears during the second year of the animal's life, when it presents only a single stem. With each subsequent year a tine appears, so that by counting the tines one can tell the age of the stag.

Even from first growth arrangements are made for the rapid shedding of the antlers. At the base of each is an irregular bulge, called the coronet, surrounding the stem. This becomes solid bone underneath the velvet, and its edges press upon the cutting of the blood supply and nerves, finally cutting its way through the skin and separating the velvet entirely from the skin of the head. The consequence of this is that the velvet dries up, shrivels and peels from the bone in shreds, although the growth in the interior of the antler is still active. A few months later the ossification at the corona obliterates the blood-vessels in the bone until this is dead.

The prettiest part of the arrangement, however, is that at the line where the antler is to separate from the pedicle on the skull a very vascular condition arises and a granulation tissue is formed, like a thin cushion between the antler and the pedicle. This quickly loosens the organic connections between the two and the dead antler falls.

During the latter part of this interesting process the deeper bone-cells of the skull prepare for a fresh effort in producing the new antler.

This shedding of the antlers is really an amputation — an auto-amputation—which takes place in the open air and aseptically. "Nature's methods of amputation," comments the Lancet, "be it by way of autonomy, shedding of an antler or fall of a leaf, are scientifically perfect and are principles of aseptic surgery in its most complete and successful application."

Heroic Criminals.

Sir William Horwood, Commissioner of Metropolitan Police of London, has just issued a roll of honor of criminals who died for England in the world war.

The list includes not only London men but those who travelled to all parts of England and whose records were filed at Scotland Yard. There are 283 names on the roll, and among them one may discover the Victoria Cross, two the Distinguished Conduct medal and one the Russian Order of St. George, fourth class.

Sir William Horwood, a copy of which has been sent to every police station in London, is prefaced by the following quotation from Pericles' oration to the Athenians at the memorial service to those who fell in the Peloponnesian War:

"Even those who come short in other ways may redeem themselves by fighting bravely for their country; they may blot out the evil with the good, and the benefit of one more by their public services than ever they injured her by their private actions."

Not Enough Flags.

A certain admiral tells an amusing story of an explosive old seaman under whom he served many years ago.

During some tactical operations one of the ships of the squadron had made some bad blunders, and at last the admiral lost his temper. He stormed about the quarter-deck, and informed his captain of his opinion of the officer in command of the erring ship.

"When he paused at last for want of breath, he turned to the signaller and said, "And you can tell him that, sir."

The man scratched his head meditatively.

"I beg your pardon, sir," he ventured, "but I don't think we have enough flags for your message."

Father's Breeches.

A reckless young Yorkshireman found a ten-shilling note in a pocket of the breeches he was wearing.

He came home uncommonly happy, having spent it royally, and told his parents of his luck.

"And, by gow," he said, "we've had a reight blow out. We'd beef an' chicken an' ham an' eggs; I doan't know what we didn't hev—an' enough to wash it down wi'. Grandest bit o' luck I've had for many a day."

His father stared hard. "Here," he shouted, suddenly, "What's in been doin'? Thou's gotten my breeches on!"

He Was Good to Her.

"Jim was always good to me," sobbed the weeping widow. "With all the beatings he gave me, he never hit me where the marks would show so the neighbors could see 'em."

GAME NOW IN DANGER

LAWS IN ONTARIO ARE NOT STRICT ENOUGH.

Provincial Biologist Nash Talks About Situation as He Sees It and Suggests a Compromise—The Old Style of "Sportsman" Cannot Hunt Without Dogs and Refuses to Give Them Up Without a Struggle.

THE Ontario game laws have not been fundamentally altered. The efforts of far-sighted sportsmen to save the deer of lower Ontario by prohibiting the hunting of deer with dogs south of the French and Mattawa rivers came to naught.

The careless, old-style sportsman, who wants his two weeks in the bush with his hounds to chase his meat to him, turned out in force and squashed any reform.

The deer are going. The partridge are thining out, despite protection on paper. The bass that once abounded in Georgian Bay are becoming a rarity.

And it is not as if civilization were driving them out. For that part of Ontario which needs protection consists of countless miles of rocky, ridged wilderness of no earthly use to cultivation. The thirty thousand islands of the Georgian Bay are mostly along a barren shore that will never see farms, except here and there a settler. The passing of deer from Halton or Huron County can be regarded with some equanimity, because farms and towns have come. The passing of game from the northern district, parts of them never to be settled, is due to relentless hunting, netting and hogging.

Charles W. Nash, the provincial biologist, one of the leading naturalists of Canada, agrees with those farsighted sportsmen who have attempted to have the game laws altered, in that the game of lower Ontario must be drastically protected or within a very few years it will be extinct.

Speaking as a naturalist, rather than as a sportsman, Mr. Nash said:

"There is no doubt that still-hunting is the most sportsmanlike way of hunting deer. But stalking deer requires a long apprenticeship and much skill in woodcraft. The average hunter, who takes two weeks to go deer hunting and never sees the bush otherwise, could never learn woodcraft or the skill of a real hunter in those short periods. To ban hounds, therefore, would mean no hunting at all for the great majority of hunters. Obliged to hunt without dogs, they would get no deer at all.

"I have come to the conclusion that the best and only way to control hunting and to preserve the deer is to prohibit the killing of deer other than bucks with horns at least four inches in length.

"This would preserve the does and fawns, which are now being slaughtered in Ontario by the thousands. This would be humane, for, to be short, because we know that one buck mates with many does, and the killing of bucks would not extinguish the species.

"Some hunters might object to that rule about bucks with horns at least four inches in length. 'How can you tell that by the horns four inches long on a running deer?' they ask. Those hunters are precisely the men the law is meant to control. They are the fellows who make a sport of a thing that moves in the woods, killing men and dogs and domestic animals.

"Such a law would confer a great benefit in that it would oblige hunters to see first what they are going to shoot at. Such a law would not handicap any particular kind of hunter. The still hunter would merely be obliged to see that his deer had horns. The hunter with hounds would have to see that it was a horned buck the dogs were chasing to him. Besides conserving the game, it would put a premium of care into deer hunting that is now wanting.

"The rule would be—if you can't see its horns, you have no business to shoot!"

Such a law should receive no opposition except from those who are game hogs and those who are shooting living and free in the woods.

As to the black bass, Mr. Nash feels there is only one reason for the desperate falling off in numbers of this greatest of game fish—netting.

"Those inlets of the Georgian Bay, countless in number, are the natural spawning grounds of the bass and lunge," said Mr. Nash. "To delplete them is to destroy the bass and lunge. And there is no doubt whatever in my mind that netting and illegal use and sale of the fish is the secret of their destruction. Netting should be absolutely prohibited in those channels, inlets and island shelters. There is absolutely no excuse for netting in the inside waters, fish run in the deeper and outer waters.

"It is, however, entirely up to the game wardens. The resident, or shore, angler, and the summer cottager cannot be expected to inform on his neighbors. Many a cottager knows of illegal netting and hunting, but he will not report it, because he does not want his cottage burned down.

"The only way is for the Department of Game and Fisheries to send wardens who are strangers into those parts, frequently, regularly, until the illegal netters are cleaned out."

Fifty years ago, Mr. Nash used to catch speckled trout in the Rosedale ravines. Toronto Bay was the greatest place for large mouth bass. But these things go, and do not come back.

A good camel will travel 100 miles a day.

PLANNED IN PRISON.

Architects of Woodwood Scrubs Were Serving Terms.

It may surprise many to know that the plans of Woodwood Scrubs Prison were drawn up by a convict in his cell while undergoing the probationary period of nine months to a long term of imprisonment.

The man was an architect, and among the foremost of his profession. He was a gentleman by birth and education, but in early life began to abuse his natural gifts, and was at the time undergoing a term of imprisonment for forgery. The completion of the work occupied him 18 months, and was effected under many disadvantages.

The prison authorities considered this marvellous specimen of architectural drawing the finest piece of work ever done by an English convict.

The convict displayed the greatest interest and pride in the erection and completion of the prison, which was built entirely by convict labor. It contained 1,400 separate cells for prisoners, which cost on an average £70 each, besides hospital wards and a chapel. The total number of bricks required was 35,000,000, each one being made by convicts on the premises.

The iron castings were obtained from Portland and Chatham Prisons, granite from Dartmoor Prison, and the Portland stone from Portland Prison. The total cost of the prison was about $500,000.

Ocean Vegetation.

Most of us know surprisingly little about the gardens of the sea, in which grow ever so many species of curious and interesting plants. Often they are torn from the bottom by storms and thrown up on the beaches, where summer visitors occasionally pick them up and dry them for collections of what they call "seaweeds."

The only way to make a satisfactory collection of the kind is to seek the plants where they grow, gathering them between the tide lines (at low tide, of course), or near the surface. At greater depths they may be fished up with long-handled rakes or tongs.

When thus gathered, they should be placed as quickly as possible in seawater—in a bucket carried by the collector, or, preferably, where the more delicate species are concerned, in a wide-mouthed bottle.

For preservation they must be dried—the large, coarse ones between blotters under pressure. All others should be mounted as quickly as possible on thick unglazed paper.

The more delicate specimens should be floated on sea-water, a piece of paper slipped under them, and the plants thereby removed from the water carefully, to be thereupon arranged on the paper to best advantage with a needle and drops of water let fall from a pipette.

They may then be dried under moderate pressure between blotters, first laying a thin white cloth over them to keep them from sticking. The whole should be changed twice a day until all moisture is removed.

Kidnapped Princess.

A strange story is told of an Indian princess kidnapped from Paris by British detectives. The Hotel Savoy, where several Egyptian political refugees reside, was the scene of the outrage. It is alleged that Sucriti Ghosan, the young daughter of an Indian rajah, became acquainted while in London with a Miss Peirce, a member of a secret committee. This man, being suspected by the police, escaped to Trieste, persuading the young princess to follow him there.

According to police information, it appears that the Sinn Feiner, under the assumed name of Canbi, was plotting with Egyptian emissaries, and that the princess was considered a suitable tool for anti-British propaganda work.

Three British detectives, stationed in a motor car before the hotel entrance, kidnapped Sucriti on her arrival at the hotel, drove her to Venice and put her on board the steamship Pilsen, bound for Bombay. It appears that the detectives under the most ordinary circumstances was made possible by documents signed by the British Embassy in Rome, but the Italian press is not satisfied, and demands an explanation.

Rothschild's Golden Rules.

The following maxims were found in the will of Baron Rothschild, the banker, shortly after his death in 1836:

Carefully examine every detail of your business.

Be prompt in everything.

Take time to consider, but decide positively.

Dare to go forward.

Bear trouble patiently.

Be brave in the struggle of life. Never tell business lies.

Make no useless acquaintances.

Never appear something more than you are.

Pay your debts promptly.

Shun strong liquor.

Employ your time well.

Do not reckon upon chance.

Never be discouraged.

Be polite to everybody.

Family Resemblance.

A visiting relative was having her first view of the small boy of four.

"He has the Barr eyes," she said, "and the Barr nose, but I don't see where he got his mouth."

The next day a member of the household was startled to overhear the small boy saying soberly to his kitten: "Listy, you have the Barr nose and the Barr eyes, but I don't see where you get your tail!"

A Matter of "Eats."

A woman was engaging a charlady to "do for her," and came presently to the delicate question of salary.

"Well, ma'am," said the honest functionary, "it's like this. If I eats myself it's $1.50 a day, but if you eats me it's only $1."

Arthur Stringer a Canadian

FEW Canadian authors are more widely known than John Arthur Stringer. He was born in London, Ont., in the year 1874. His book "Lonely O'Malley" gives a good idea of his boyhood. He received his education at the London Collegiate and was there particularly enlisted, as declares. He then went to the University of Toronto, then to the University of Oxford. After leaving Oxford he spent a year and a half in Germany. Mr. Stringer began publishing his poems at the age of sixteen. His first poem was published in Goldwin Smith's paper, "The Week," and a kind and encouraging note from Mr. Smith fired the youthful poet with the ambition to follow the thorny path of literature. His second poem he sold to the Canadian Magazine. While at the University of Toronto Mr. Stringer took a great deal to the "Varsity" and did sketches for Saturday Night. Mr. Clark of the latter paper was the first to pay him money for his stories.

After returning from Germany Mr. Stringer accepted a position on the Montreal Herald at a dollar per day. After leaving the Herald he accepted an editorial chair with the American Press Association. His first novel, "The Silver Poppy," was written and published, and feeling he needed more time to spend on his writing, he resigned his position and became a free lance. Harvey O'Higgins, Arthur McFarlane and Arthur Stringer then clubbed together and rented the old Peter Smith dumbledown, old mansion on lower Fifth avenue, New York. Here they wrote to their hearts' content, and tried to scare the fabled wolf from the door. What poet does not have trouble with that savage beast? Mr. Stringer sold his first three stories in a bunch for $25, an, he confesses, he was paid cash, as the three young writers were desperately in need of the money. In the next studio was Ernest Seton Thompson, who appeared very prosperous and famous to the struggling young scribes.

Slowly but surely they made their way, even taking the matrimonial venture. Then, tiring of New York and longing to be with his own people once more, Mr. Stringer left the skyscrapers and came to Canada, purchasing a beautiful farm at Cedar Springs, on Lake Erie, seven miles from lovely Rondeau. Here, at "Shadowy Lawn," was peace and quiet to be found as well as inspiration.

Mr. Stringer is very fond of travelling, and generally spends his winters in globe trotting. One winter he spent in Southern California, where he wrote "The Prairie Wife" and "The Door of Dread," "The Island of Peril," "The Prairie Wife," "The Prairie Mother." His last book, "The Prairie Child" is appearing serially in the Pictorial Review and will come out in book form in the spring of 1922. In this book we will once more meet charming Cherdie McKail and find out how Donald Duncan won out.

As a poet Mr. Stringer is as famous as a novelist. His volume, "The Woman in the Rain," runs the entire gamut of human emotions. "Sappho and Leucadia" is imaginative, passionate, and artistic work of surpassing quality. He has published several volumes of verse, but he is not at present publishing poems in magazines, he has not given up poetry by all means. He is working from time to time on a volume of poems that will be published next year, and on a second volume for 1923.

He is keenly interested in the Canadian Authors' Association and hopes it will have a beneficial influence. He has sold many of his books produced on the motion picture screen. Whether the pictures do Mr. Stringer's work justice I cannot say, never having had the pleasure of seeing them.

He at present resides during the winter in Chatham, and has two charming little boys—Bob and Barney. Bob asked the other day why he should be spanked for telling stories, while his daddy got money for doing the same thing. Mr. Stringer was just getting ready for a four-week trip through the Northwest, ten days canoeing down the Peace river, a ride on the Rockies, and then a detour down the Pacific coast to Vancouver, where he will no doubt find setting for a new novel. We wish the young people never to forget that he wants to be reckoned as a good Canadian, and will always remain so.

A Large Sturgeon.

A sixty-five-pound sturgeon, five feet ten inches long, was recently caught in the Red Deer river at Drumheller, Alberta, by some miners fishing near the Midland mine. Five men in all were required to get it to dry land, gradually playing it in shallow water, when one of the fishermen cut its throat. The fish is thought by old-timers to be the largest caught in the river at Drumheller. Another, presumably of the same size, was seen in the water at the time this fish was caught.

THE TRIALS OF A HOUSEWIFE

How They Have Been Endured and How Overcome by Lydia E. Pinkham's Vegetable Compound

Experience of a Providence Woman

Providence, R. I.—"I took Lydia E. Pinkham's Vegetable Compound for a female trouble and backache. It began just after my baby was born, and I did the best I could about getting my work done, but I had awful bearing-down pains so I could not stand on my feet. I read in the papers about Lydia E. Pinkham's Vegetable Compound and the good it was doing other women, and I have got dandy results from it and will always recommend it. You can use these facts as a testimonial if you wish."—Mrs. HERMAN L. CASSEN, 18 Mesi Court, Providence, R. I.

Ohio woman for three years could hardly keep about and do her housework—she was so ill. Made well by Lydia E. Pinkham's Vegetable Compound: Fayette, O.—"For about three years I was very nervous and had backache, headache, dragging-down pains, could not sleep at night, and had no appetite. At times I could hardly do my housework. I got medicine from the doctor but it did not help me. I saw Lydia E. Pinkham's Vegetable Compound advertised in a newspaper and took it with good results and am now able to do my housework. I recommend your medicine to my friends and you may publish my testimonial."—Mrs. CHESTER A. BALL, R. 15, Fayette, Ohio.

An Illinois woman relates her experience:

Bloomington, Ill.—"I was never very strong and female trouble kept me so weak I had no interest in my housework. I had such a backache I could not cook a meal or sweep a room without raging with pain. Rubbing my back with alcohol sometimes eased the pain for a few hours, but did not help it. I heard of Lydia E. Pinkham's Vegetable Compound, and six bottles of it have made me as strong and healthy as any woman; and I give my thanks to it for my health."—Mrs. J. A. MCQUITTY, Washington St., Bloomington, Ill.

The conditions described by Mrs. Cassen, Mrs. Ball, and Mrs. McQuitty will appeal to many women who struggle on with their daily tasks in just such conditions—in fact, it is said that the tragedy in the lives of some women is almost beyond belief. Darin and day out they slave in their home for their families—and beside the daily routine of housework, often make clothes for themselves and for their children, or work in their gardens, all the while suffering from those awful bearing-down pains, backache, headaches, nervousness, the blues, and troubles which sap the very foundation of life until there comes a time when nature gives out and an operation seems inevitable. If such women would only profit by the experience of these three women and remember that Lydia E. Pinkham's Vegetable Compound is the natural restorative for such conditions it may save them years of suffering and unhappiness.

There is hardly a neighborhood in any town or hamlet in the United States wherein some woman does not reside who has been restored to health by this famous medicine. Therefore ask your neighbor, and you will find in a great many cases that at some time or other she, too, has been benefited by taking it, and will recommend it to you. For more than forty years this old-time tried root and herb medicine has been restoring suffering women to health and strength.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

SQUARE TREES.

British Forestry Association Want to Grow Them.

A few months ago, a suggestion was made to the Forestry Association of Cambridge, England, to the effect that trees can be made to grow square instead of round, thus producing timbers of desired cross section without waste. Although this suggestion became the subject of considerable chafing, yet some remarkables more wonderful have been performed in the plant world—the production of the seedless orange and the rose bush on which grows flowers of a variety of colors, for instance.

T. E. Phillips describes in The Patchinder the "square trees" that he saw in large numbers in Honduras. He cuts up many of these trees into lumber, he says. The tree becomes the cedar family and is known to the natives as the "guachavelin." They are not all square; some of them have curving sides or are rhomboidal in shape, but none of them are round.

Something akin to growing square trees has been practiced for centuries. For example the roots of the white bryony, which attain a great size, are often grown to shape. Anyone with a garden may produce plant curiosities if he goes about it in the right way. An interesting experiment which may be successfully performed by any gardener is to arrange a dish of sweetened water close up under a heavy young gooseberry bush at blossoming time so that the dead corolla of a flower (the tip at the end of the berry opposite the stalk) just touches the water. If the sweet water is replenished as the greedy young berry absorbs it the latter will grow to enormous proportions; specimens as large as a good-sized hen's egg are easily possible.

Another interesting experiment is to soak an old sponge in water and then sprinkle into its pores various seeds, including those of cress, mustard, beet, carrot, onion and flax. Suspend the sponge in the window of a warm room and keep it moist. Within a short time the seeds will germinate and grow until the sponge becomes a mass of beautiful foliage.

Similar results may be obtained with a brick, preferably a soft, porous one. Soak it in water, cover it with flannel and then place it in a dish of water near a window. Small pieces of the seeds of cress and sprinkled liberally on the flannel. Within a short time the seeds will germinate and the rootlets of the young plants will force their way through the meshes of the cloth the better to obtain the vital moisture. As the stems and leaves develop the flannel should be kept moist and should be a beautiful bit of verdure.

Again the Overblouse.

Blouses continue to be made to wear over the skirt, although many of them are greatly attenuated. Tiebacks, surplice effects of various kinds and peasant types continue in favor, the tucked blouse invariably being of more tailored type, or the lingerie type with its ever-popular cascaded frill at the front or sides. Pleated embroidery having registered for winter refuses to be ousted for spring, and among the lingerie types, which include many fine voiles, there are eyelet embroidery motifs to no end. A voile blouse may have the yoke and collar, a round bosom and cuffs of eyelet work, or for that matter the entire blouse may be fashioned of it, no matter what its color.

Bowling Bonspiel.

At the Bowling Green on Wednesday afternoon the Club will hold a bonspiel. All members wishing to take part will assemble at the club house at 2 p.m. on Wednesday. Skips and rinks will be chosen at the ground. The ladies will serve tea and entertain the lady golfers from Kingston.

Belleville Police Get "Moonshine" Outfit.

Belleville, June 26.—Local officers located an illicit still yesterday 18 miles east of Tweed, in the township of Kaladar. They brought Caville Brushey to the city, holding him in connection with the seizure. Later in the day Inspector Exley, of Napanee, came to the city, as the seizure was made in his territory. The officers who discovered the still were Collector of Inland Revenue A. G. McLeod and Inspector Naphin and P. Ward.

Wounded Daughter Cannot Appear for Three Weeks.

Cecelia Tryon, alleged to have been shot at Kaladar by her father, now awaiting trial in Napanee jail, will not be able to give evidence at the preliminary hearing for three weeks yet, according to Dr. L. J. Austin, who has been attending her. The father, Kenneth Tryon, was to have appeared at the postponed preliminary hearing on Friday, but it was enlarged for another week. So far as is known no statement has been made by the girl and the hearing will probably not proceed until she can appear in person.

At H. W. KELLY'S grocery you can get the best Creamery Butter 33c. per lb; Oleomargarine, 28c. per lb.; Pure Bulk Cocoa, 20c. per lb.; Lily White Syrup, 60c. per tin; Canned Peas, 15c. per can; also French peas on hand. This is pineapple week, be sure and get your supply for canning. We get a fresh shipment twice a week. Now don't forget about your Coffee, don't drink coffee that has been ground for a year, come and get a lb. of Kelly's Famous Blend Coffee, ground fresh every day. None can equal it. Same blend as John Paisley always kept at H. W. Kelly's, Campbell House corner.

Special Sale of Electric Ranges

---Installed

For a limited time we are again giving our customers an opportunity to equip their homes with electric ranges and water heaters at very attractive prices.

During our former campaign we installed a number of ranges, and the records of their operation proves conclusively that electric cooking is most desirable and economical.

Many customers have expressed regret that they did not take advantage of the very attractive price at that time, so we hope that they will not again let the opportunity pass.

Where desired we are extending payments over a period of twelve months.

Already a number have placed their orders, and we would suggest that you call at our office early and obtain full details of our plan.

Orchard Party.

Reserve the date, July 8th, 1921, for the Orchard Party to be held on the parsonage grounds, Selby.

Dominion Day Dance.

Make the day's celebration complete by attending the dance given by The Waiters' Orchestra in the Town Hall, Napanee, Friday evening, July 1st., 9 p.m. to 1.30 a.m. Gentlemen $1.50 (including war tax). Ladies free.

Orchard Party at Selby.

An Orchard Party will be held on July 8th on the parsonage grounds Selby. Good music will be supplied by the Napanee orchestra. There will be booths, fish ponds, swings, an ice cream parlor and lemonade. Refreshments will be served. Everybody come and bring your friends. Admission, adults 35c.; children under 12 years, 20c. There will be a baseball game at 6 p.m., the same evening.

Change in Time, Canadian National Night Trains Between Toronto and Ottawa.

Effective Sunday, June 26th, Canadian National night trains, Nos. 7 and 8, between Toronto and Ottawa, will operate via Grand Trunk double track between Toronto and Coldbright. No. 8, east bound, will leave Napanee 2.43 a.m., standard time. No. 7 will arrive from Ottawa 2.10 a.m. daily. Tickets and full information from nearest Canadian National or Grand Trunk ticket agent.

Dundas Street Paving.

From opinions gathered among the residential property owners on Dundas street, very few object to the pavement, but a number are of the opinion that, residential property should not bear as heavy a charge per foot as the business portion, and an effort will probably be made to have the proportion paid by residential property lessened. No one doubts for a minute that the paving is not going to be a splendid asset to Napanee, but of the wisdom of building this year there are different opinions. The Construction Company are making good progress with the work, and in a very short time the citizens of Napanee will be able to inspect a sample of completed roadway.

Odessa—October 7th.
Centreville—Sept. 16-17th
Colborne—September 27-28th.

Wilson-Edmunds.

At Trinity Church, on Thursday afternoon, at four o'clock, Miss Lorenia Wilson, B.A., eldest daughter of Mr. and Mrs. Jas. A. Wilson, was united in marriage to Ernest W. Edmunds, B.A., of St. Catherines. Rev. Dr. Shorey performed the ceremony in the presence of the immediate relatives of the bride and groom. They were unattended. The bride looked lovely in a travelling suit of taupe tricotine with hat to match and carried a shower bouquet of sweetheart roses and orchids. The wedding march was played by Prof. Baird. Following the ceremony a dainty buffet lunch was served at the home of the bride's parents, and the young couple left for a short trip to Montreal. An unusual number of beautiful gifts were received by the bride, among them gifts from the Milton Public School, Sunday School and church. On their return from their honeymoon Mr. and Mrs. Edmunds will return to Napanee for a short time and then go to Toronto to make preparation for his work as missionary in China. Both bride and groom are graduates of Victoria College, Toronto. About the first of September they will sail from Vancouver for China to take up work in the Chinese University in West China. The out-of-town guests for the wedding were: Mrs. W. G. McKay, St. Catherines, sister of the groom; Mrs. F. R. Todd, Hamilton, sister of the bride; Mr. Herbert Wilson, Adolphustown, Miss Florence Ribey, Toronto, Mrs. Dr. Chas. Wilson, Toronto, Mr. and Mrs. John T. Wilson and daughter, Isobel, Toronto, and Mrs. C. H. Boyes, Kingston.

PARLIAMENTARY LETTER

Ottawa, June 24th.—The intimation received here a few days ago to the effect that the Greek Government would not meet the interest charges on the money advanced to it by Canada caused little surprise; in fact, it had been expected, some time ago, that this "loan" would be on the same basis as that to Rumania. To Joseph Archambault, member for Chambly-Vercheres goes the credit for bringing out the facts in connection with these "loans" and for showing how, even during the strenuous days of war and reconstruction, the government was able to help its friends the manufacturers to get rid of a lot of surplus material which they had piled up in their stock rooms, or to give them orders for the manufacture of new commodities and then continue their war-time profits.

Usually, the returns to orders of the House are of the dry-as-dust order, but at times one of them is filled with a wealth of information which shows which way the political winds blow, and how the powers that be temper the winds of adversity to the shorn lambs.

In preparation for his speech, Mr. Archambault had placed a series of questions on the Order Paper in the Commons, and after pressing for two years for the facts he sought, he was enabled to give the House and the country some startling information of the workings behind the scenes when Canada, through Union Government, undertook to finance purchases here of Greek and Rumanian authorities. Mr. Archambault's speech caused some consternation in the Government ranks, especially when he observed that he had dealt with the same subject at the previous session and thought his remarks then would have had some effect.

Sessional Paper 147 brought down in answer to Mr. Archambault's questions, showed that of some $27,000,000 spent on these credits, only three and one half million had been used to purchase foodstuffs and the rest had gone for manufactured articles which the friends of the government, were producing for sale. Military stores and equipment to the value of two million dollars went to those countries at prices much lower than the people of Canada could buy them for at home, and the countries to which they were supplied have not even paid the interest on the monies.

The Government's figures supplied to Mr. Archambault showed roofing contracts for $65,000 to the Brantford Roofing Co., of which W. F. Cockshutt, M.P., is Brantford, a director. The Welland Vale Manufacturing Co., of which Mr. Chaplin (Lincoln) is a director, got $137,210 for edged tools. Other contracts awarded to companies who had one or more directors in the Commons or Senate were:

Maritime Hall Co., St. John, S. Elkin, director, $77,304.

Peck's Rolling Mills, Lloyd Harris director, $26,624.

Monarch Knitting Co., F. R. Lalor, M.P., $293,295.

Stanfield's, Limited, (Senator John Stanfield) $21,760.

Renfrew Woollen Mills (Senator O'Brien) $114,041.

The Dominion Iron and Steel Co., received $66,138 of the amounts paid out during the last year. Directors in this company include Senator C. P. Beaubien, Edmund Bristof, M.P., Stanley Elkin, M.P., Sir William Mackenzie, Hector McInnes, M.C., Hon. Frederick Nicholls and Sir Clifford Sifton.

During the previous year Mr. Archambault had called to the attention of the House the fact that the Sherwin-Williams Paint Co., and the Canada Paint Co., in both of which Hon. C. C. Ballantyne was a director had shared in these orders to the extent of $48,000.

The House of Commons Act, the member for Chambly-Vercheres pointed out, provides for the disqualification of members who were interested in contracts with the government. In this case, the members named might be within the letter of the law, since they were directors and shareholders and not proprietors, but there was not a very great difference between a proprietor and a director in a concern who owned a great number of shares.

"I know what the answer of my honourable friends will be," Mr. Archambault declared on the floor of the House. "They will say that they have not personally sold to the government, and that the government bought not for the Canadian people, but for Rumania and Greece. Technically, they are right; as a matter of law, we could not succeed if the matter came before the courts. They are within the letter of the law, but Sir, they are not within the spirit of the law.

"This law was passed to prevent the government from winning the influence of members or senators by selling goods from them or from the companies in which they had the chief interest. What difference is there, Mr. Speaker, between a proprietor and a director owning a great number of shares in a business? If this loophole satisfies my honorable friends, well and good, but the fact remains that monies have been disbursed by this government in the purchase of goods from Members of Parliament and Senators or companies in which they were interested, and that this money will, in all probability, never be reimbursed by Rumania and Greece.

"This transaction will throw a shadow of doubt on the independence of Parliament. But, Sir, it is perfectly in line with the standard of morals held by this government.

"When the Prime Minister endorsed the attitude, and could see nothing wrong in the letter written by the Minister of Customs and Inland Revenue to the French Purchasing Commission, seeking business, as a cabinet minister, for the private firm of Nagle and Wigmore, of St. John, it was up to the high standard of morality which has characterized this government all along."

It was perhaps significant that there was no answer to the statements of Mr. Archambault, though the session lasted some twenty days after he had made the above speech.

Arsenate of Lead and pure Paris Green at WILSON'S HARDWARE.

TRINITY METH. CHURCH

Pastor—Rev. S. J. Shorey, D. D.

The Rev. Dr. Shorey will conduct the services next Sunday at 10.30 a.m. and 7 p.m.
11.45—Sunday School.

CHAUTAUQUA

Napane is upholding its established reputation. For two years we were assured by the Dominion Chautauqua that our community led the entire list of Ontario chautauqua towns in point of attendance at chautauqua sessions. Not only were we the largest crowd, but we were also the best crowd. Chautauqua spirit involves more than mere members. Without a proper and an enthusiastic interest a large crowd would be a liability rather than an asset. Napanee, however, boasts not only of quantity, but of quality.

Attendance to date for each of this year's sessions points to a total which will just a little more than equal that of last year. We hope that chautauqua fans will continue to tell their neighbor friends of the good things they are missing and induce them to attend the remaining sessions. The quality of the first half of the program justifies high expectations for the last half. Lovers of the good things in music were offered a rare treat by the Zedeler Quintet. Individual efforts of the members of the Quintet displayed thorough training as soloists and the ensemble and symphonic numbers were perfect in their rendition. Herbert Leon Cope lived up to his reputation as the continent's leading humorist and convulsed his audience with laughter. However, the fine thing about Cope was the fact that he lost no opportunity to drive home good solid, sensible facts. Saturday's program was unusual in two respects. The Dominion Chautauqua tried the usual plan of presenting only adult artists and presented Alice Louise Shrode, the child entertainer. We doubt if any entertainer on the platform in the last few years has equalled the artistry displayed by this twelve-year-old child. Her program will always be remembered as one of the outstanding features of chautauqua. The usual program was varied again when Pamahasika and his famous pets appeared Saturday night. His exhibition was not only highly entertaining, but was an educational treat in that it showed what wonderful results can be attained by kindness and patience in animal training. The tricks performed by the beautiful troupe of birds were a revelation.

William H. Stout, President of the International Lyceum and Chautauqua Association, proved his power as a speaker and the practicability of his ideas in his lecture, "Seeing Life Whole." He placed for a greater personal efficiency and a breadth of understanding.

The Gilvan Light Opera Singers appeared in two beautiful programs Monday. Especially was their presentation of Gilbert and Sullivan's "Rudeore" well received Monday night. Music critics pronounced it as one of the best things ever presented in Napanee. Major Runnells, of Montreal, on Monday afternoon presented a wonderful lecture, entitled "Sea Power and World Freedom." Major Runnells' experience in the late war and his presence at the surrender of the Germans fleet at Scapa Flow, especially fitted him to present the illuminating facts contained in his lecture.

Paridie.

Passenger Boat "Paridie," will run every day from Napanee to Picton and return, leaving Napanee at 7 a.m., leaving Picton for return at 2 p.m., excepting Saturdays, leaving Napanee at 6 a.m., enroute for Adolphustown and Picton, stopping at all docks, if flagged. 28-tf

MICHAEL MAKER'S
Dry Goods Store

Latest Announcement

Look! Listen! and Save Money

From Friday, July 1st
Until further notice

Special For You--- With every $6.00 (Six Dollars) worth of goods purchased in this store there will be given to you—free of charge—a first-class HOUSE BROOM.

Free! Free! Free!

You are specially invited to come and take a look around yourself.

You haven't got to buy—you will buy of your own accord. TO COME—IS TO SAVE.

M. MAKER'S Dry Goods Store.

OTHER TABLETS NOT ASPIRIN AT ALL

Only Tablets with "Bayer Cross" are Genuine Aspirin

If you don't see the "Bayer Cross" on the tablets, you are not getting Aspirin—only an acid imitation.

The "Bayer Cross" is your only way of knowing that you are getting genuine Aspirin, prescribed by physicians for over nineteen years and proved safe by millions for Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis, and for pain generally. Made in Canada.

Handy tin boxes of 12 tablets—also larger sized "Bayer" packages can be had at drug stores.

Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross."

PRACTICAL JOKE WAS FATAL

Young Man Drowned When Pushed In by Fellow-Bather.

TORONTO, June 27.—A practical joke played on him by a fellow-bather late Sunday afternoon, resulted in the drowning of Sam Clarke, aged 21, colored, in the turning basin at the extreme east end of ship channel at the foot of Booth avenue. Harold Breen, aged 18, the youth who is said to have been the perpetrator of the joke, was arrested later by Detective Winters on a charge of manslaughter.

Clarke, who had been in bathing, was sitting on the sea-wall smoking a cigarette, when Breen approached him quietly from behind and gave him a shove, precipitating him into the water. Whether the cigarette got lodged in the unfortunate man's throat, or whether he lost his presence of mind is not known, but he wallowed around in the water for the space of a few seconds and went down. He came to the surface almost instantly but again went down. It was not until he had gone through this performance four times that the others within sight of the wall and swimming near him realized that he was not intentionally trying to frighten them. Constable Stanley Rams then awoke to this realization, and he went to the man's assistance, but, according to his story, could get a hold of him. He gave up the attempt to aid the man, who sank for the last time.

The life-savers were summoned and Capt. Russell responded in the speed boat, making a record run. The body was recovered in less than four minutes in eighteen feet of water, and Russell and his men worked over the unconscious man with the pulmotor and the application of methods of artificial respiration for over half an hour without results.

KILLED BY LIGHTNING.

Bolt Struck Tree Under Which Boys Were Standing.

TORONTO, June 27.—During the severe electrical storm, which swept the north of the city Sunday afternoon, two lives were lost. The dead are Morris Groh, aged 17 and Clinton Groh, aged 14. The boys were killed when they took refuge from the storm under a tree after being in swimming, while their companion Louis McKenzie, aged 17, was seriously injured by the same lightning bolt.

The three boys, Morris, Groh and McKenzie, were in swimming in a small creek north of the C. N. R. tracks, at the head of Weston road avenue, when the storm commenced. Fearing that their clothes, which were lying under a large oak tree nearby, would get wet, they waded to the bank. Just as the two former boys reached down to pick up their clothing, the tree at the foot of which they stood was struck by lightning, and they stiffened and crumpled in their tracks. McKenzie was shocked into unconsciousness and was thrown violently backwards to the ground.

When he came to, McKenzie shouted for help, and his cries brought to the scene, Delbert Johnston, William Baiter and Bert Smith. After carrying McKenzie to the Johnston home, County Constable Wilkins and Dr. Spence, Danforth avenue, was called. Dr. Spence pronounced the lives of Groh and Morris extinct, and confined his attention to the McKenzie boy, who was paralyzed from the knees down. The boy's legs were massaged for some time, the paralysis was driven down to the ankles, and Sunday night the boy was reported as doing nicely.

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. Catarrhal Deafness requires constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions.

MAKES BID FOR PEACE

De Valera and Craig Invited to Conference in London.

Premier Lloyd George Follows Up the King's Appeal for Settlement by Endeavoring to Unite Irish Parties In Common Understanding to End Dastardly Crimes of Sinn Feiners.

LONDON, June 27.—Almost on the eve of the application of still sterner military measures in Southern Ireland, the Government has made one more effort to make peace with the Sinn Feiners.

Following up the King's personal appeal at the opening of the Ulster Parliament to all Irishmen to pause and to forgive and forget, Premier Lloyd George on Monday invited Eamon de Valera, inviting him to come to London with any colleague he might select to attend a conference with the British Government and Sir James Craig, Premier of Ulster, "to explore to the utmost the possibility of a settlement."

Lloyd George's invitation to De Valera explains the release of the latter within a few hours of his recent arrest. His action comes as a surprise. It had become an accepted fact that the British authorities were of the opinion that De Valera free was of more use to them than De Valera in jail, and that, whatever other leaders might be forced to be "on the run," he was to be left unmolested. His action comes as a surprise, when he called an immediate strike of the city police in concert with the firemen, to force the city to grant an all-round increase in pay of $1.50 per week.

A detachment of 125 officers and men of the 22nd Royal Regiment, under the command of Col. Henri Chasse, D.S.O., M.C., guarded the City Hall until 11.45 Sunday night, when they left for the barracks. All was quiet at that hour.

The damage so far, however, has been confined to the breaking of some hundred street lamps, two of them in front of the mayor's residence.

False alarms poured in uninterruptedly at the fire halls, but no real blazes were reported. Only 10 police sergeants are remaining on beats out of a force of 130. Of the 185 firemen only four grizzled sub-captains and Chief Donnelly are left.

The decision to strike followed a delay by the city in carrying out the recommendation of a conciliation board, which suggested an increase in pay for police of $1 per week and 75 cents for the firemen.

The city at six o'clock Saturday sent a communication to the police assuring them that the increase would be paid, and attributed the delay to circumstances attending the raising of the appropriation.

The communication, according to Chief of Police Trudel, was delivered by him personally to President Brisson of the Firemen's Union. Saturday a number of the strikers interviewed the chief and informed him that the communication had not been read to them.

A 9.35 a report was brought to the City Hall that a mob had entered No. 5 Fire Station on Dalhousie street and had give those in charge ten minutes in which to vacate.

The mayor and members of the City Council are receiving the reception room during the greater part of the evening awaiting reports from outside.

Wild rumors that mobs were marching on the City Hall filtered in hourly, but subsequent investigations proved these to have been ill-founded.

The tension all evening far exceeded the developments. On all sides could be heard the half-repressed reminiscent whispers of the famous Quebec riots which followed conscription. From every tongue the query dropped: "Will it happen again?"

Advice received about 11.30 p.m. was to the effect that having failed to hear from the city in response to their ultimatum, had quietly adjourned their meeting and dispersed to their homes.

The men's meeting was addressed by Abbe Delisle, who counselled them against violence or demonstration. The strikers loudly proclaimed their intention to refrain from such actions, but with equal vigor proclaimed their decision to remain on strike until both police and firemen receive an all-round increase of $1.50 per week to their wages.

The mayor expressed himself as confident that no trouble would develop.

The mayor and aldermen have decided to make no concession to the strikers and to adhere to the terms of the arbitration Board which awarded $1 a week increase on the scale, which varies between $17 and $25 a week to the police, and in the case of firemen it provides sent a letter to the mayor calling for an increase of $1 a week and threatening to walk out unless it was granted. The city adhered to its decision and at midnight the men on duty walked out, leaving the stations unguarded. There are 190 firemen and 140 police.

A New Post.

O. S. Finnie, well-known mining engineer, has been apointed administrator of the new oil territory on Mackenzie river. The position is virtually that of governor of this vast wilderness. The advance guard, consisting of a party of about 35 men, is now in Edmonton collecting supplies and making preparations for the journey into the north. Others will follow, and the staff of the administrator will be most complete. It will include a detachment of the Royal Canadian Mounted Police for the preservation of law and order. There will be civil servants, as well as geologists, surveyors and engineers, and all the workers necessary for the opening up of a new country and the establishment of a government.

POLICEMEN ON STRIKE

Quebec City Left Without Any Protection.

Fire-fighters Went Out at the Same Time as Constables, and All Are Demanding Small Increase In Their Pay — First Day Passes Without Any Serious Blaze or Crime.

QUEBEC, June 27.—The keys of the city were handed over to the pickpockets who swooped on the city for the Quebec Hunt Club race meet, by the leaders of the Policemen's Union here at midnight Saturday, when they called an immediate strike of the city police in concert with the firemen, to force the city to grant an all-round increase in pay of $1.50 per week.

A detachment of 125 officers and men of the 22nd Royal Regiment, under the command of Col. Henri Chasse, D.S.O., M.C., guarded the City Hall until 11.45 Sunday night, when they left for the barracks. All was quiet at that hour.

The damage so far, however, has been confined to the breaking of some hundred street lamps, two of them in front of the mayor's residence.

The city adhered to its decision and at midnight the men on duty walked out, leaving the stations unguarded. There are 190 firemen and 140 police.

A New Post.

O. S. Finnie, well-known mining engineer, has been apointed administrator of the new oil territory on Mackenzie river. The position is virtually that of governor of this vast wilderness. The advance guard, consisting of a party of about 35 men, is now in Edmonton collecting supplies and making preparations for the journey into the north. Others will follow, and the staff of the administrator will be most complete. It will include a detachment of the Royal Canadian Mounted Police for the preservation of law and order. There will be civil servants, as well as geologists, surveyors and engineers, and all the workers necessary for the opening up of a new country and the establishment of a government.

CATTLE MARKETS

TORONTO LIVE STOCK.

TORONTO, June 27.—Live stock receipts at the Union Stock Yards last week were: To-day's market to-day's cars—Cattle, 3,752; calves, 699; hogs, 1,568; sheep, 1,092.

WINNIPEG LIVE STOCK.

WINNIPEG, June 27.—Receipts today were 88 cattle, 70 calves, 235 hogs and 9 sheep.

With only limited offerings, trading was very quiet, with cattle prices steady with Friday's close. No good butcher steers were offered, the bulk being medium steers and cows.

The hog market remained steady at Friday's close.

There was little activity on the sheep and lamb market, offerings being of poor quality.

BUFFALO LIVE STOCK.

BUFFALO, June 27.—Cattle receipts, 500; dull.

Calves, 850; slow; $1.50 lower; $6 to $10.50.

Hogs, 2,400; steady; heavy mixed yorkers, light yorkers and pigs, $9.25; roughs, $7 to $7.25; stags, $4.50 to $5.50.

Sheep and lambs, 1,200; lambs, $5 to $11.50; yearlings, $3.50 to $9; wethers, $5 to $6.50; ewes, $1 to $4.50; mixed sheep, $4.50 to $5.

CHICAGO LIVE STOCK.

CHICAGO, June 27.—Cattle receipts, 1,000; compared with week ago, choice prime fed steers, 10c to 25c lower; inbetween grades, 25c to 50c; choice cows and grassy kinds, 75c to $1; she stock mostly generally steady; canners, cutters and bulls, 25c to 50c, lower; veal calves, 50c to $1 higher, spot cows and heifers, 25c to 50c lower.

Hogs, 5,000; light hogs and butchers, steady to strong, others mostly 10c to 15c lower; top, $8.80; bulk, $8.10 to $8.75; pigs, mostly steady.

Sheep, 6,000; Saturday's receipts direct, compared with week ago, lights mostly steady, some native lower, low grades and heavy sheep around 50c lower; handy weights mostly 50c higher.

FRENCH MISSION ARRIVES.

Were Welcomed to Canada by Hon. C. J. Doherty.

MONTREAL, June 27.—The members of the French Mission, headed by Marshal Fayolle, who arrived here Saturday, were welcomed to Canada by the Acting Prime Minister, Hon. C. J. Doherty. Senator Beaubien, presiding at the luncheon, given the mission, welcomed them on behalf of French-Canadians generally. Hon. Mr. Doherty spoke of the esteem, admiration and profound affection for the guests, and of his still more profound admiration and sincere love for the country which they represented.

Senator Gaston Menier and M. Dal Piaz, president of the Canadian General Transatlantique, performed the ceremony of inaugurating the exhibition train. This took the form of introducing the model exhibit. There will be eight cars on the exhibition train, and one of them, showing the music, art, literature, education and progress of France, will be in charge of Senator Raymond Poincare, ex-President of the French Republic. Others will be devoted to colonization, silk goods, leather work, chemistry and perfumes, scientific instruments, agricultural implements and machinery.

The French Mission sailed from here for Quebec at 10.45 Sunday morning on the harbor steamer Sir Hugh Allan.

Declined Allied Offer.

ATHENS, June 27.—The note of Greece declining the offer of Premier Great Britain and Italy to mediate in the trouble between the Turks and the Greeks in Asia Minor, says Greece finds herself in a position in which military interests are to guide her conduct and decisions. An abandonment of the offensive against the Turks, it says, would compromise and prejudice the position of Greece and give courage to the Turks.

The note adds that Greece will be ready to hear concrete proposals from the Allies during every phase of the negotiations and that the aspirations will obtain Spanish terms from the Turks.

New York Man Suicides.

BANFF, Alta., June 27.—Geo. L. Dyer, president of the Geo. L. Dyer Co., 42 Broadway, New York, committed suicide at the hotel in the sanatorium here on Sunday morning, shooting himself in the right temple with a .32-calibre revolver. The body was found lying in front of the dresser with the head supported by a suitcase upon which it had evidently fallen. The police were summoned and took charge of the dead man's effects, finding in the pockets of his clothes a letter of credit for $3,000, $4,881 in express money orders, and $818 in bank notes and gold.

The VOICE OF THE PACK

By EDISON MARSHALL

COPYRIGHT, 1920 BY LITTLE, BROWN AND COMPANY.

He helped Dan with his bag to a little wiry automobile that waited beside the station. They got into the two front seats, and a moment later were starting up the long, curved road that led to the Divide.

During the hour that they were crossing over the foothills, on the way to the big timber, Silas Lennox talked a great deal about the Dan Fairbairns that had been Dan's grandfather. A mountain man does not use profuse adjectives. He talks very simply and very straight, and often there are long silences between his sentences. Yet he conveys his ideas with entire clearness.

Dan realized at once that if he could be, in Lennox's eyes, one-fifth of the man his grandfather had been, he would never have to fear again the look of disappointment with which his host had greeted him at the station. But instead of reaching that high place, he had only—death. He knew what his destiny was in these quiet hills. And it was true that he began to have secret regrets that he had come. But it wasn't that he was disappointed in the land that was opening up before him. It fulfilled every promise. His sole reason for regrets lay in the fa that now the whole mountain world would know of the decay that had come upon his people. Perhaps it would have been better to have left them to their traditions.

He had never dreamed that the fame of his grandfather had spread so far. For the first ten miles Dan listened to stories—legends of a cold nerve that simply could not be shaken; of a powerful, tireless physique; of moral and physical strength that was seemingly without limit. Then, as the foothills began to give way to the higher ridges, and the shadow of the deeper forests fell upon the narrow, brown road, there began to be long gaps in the talk. And soon they rode in utter silence, evidently both of them absorbed in their own thoughts.

Dan did not feel oppressed at all. He merely seemed to fall into the spirit of the woods, and no words came to his lips. Every mile was an added delight to him. Not even wine could have brought a brighter sparkle to his eyes. He had begun to experience a vague sort of excitement, an emotion that was almost kin to exultation, over the constant stir and movement of the forest life. Once, as the car stopped to refill the radiator from a mountain stream, Lennox looked at him with sudden curiosity. "You are getting a thrill out of this, aren't you?" he asked wonderingly.

It was a curious tone. Perhaps it was a hopeful tone, too. He spoke as if he hardly understood.

"A thrill!" Dan echoed. He spoke as a man speaks in the presence of some great wonder. "Good Heavens, I never saw anything like it in my life."

"In this very stream," the mountaineer told him joyously, "you may occasionally catch trout that weigh three pounds."

But as he got back into the car the look of interest died out of Lennox's eyes. Of course any man would be somewhat excited by his first glimpse of the wilderness. It was not that he had inherited any of the traits of his grandfather. It was absurd to hope that he had. And he would soon get tired of the silences and want to go back to his cities. He told his thoughts—that it would all soon grow old to him; and Dan turned almost in anger.

"You don't know," he said. "I didn't know myself, how I would feel about it. I'm never going to leave the hills again."

"You don't mean that."

"But I do." He tried to speak further, but he coughed instead. "But I couldn't if I wanted to. That cough tells you why, I guess."

"You mean to say—" Silas Lennox turned in amazement. "You mean that you're a—a goner? That you've given up hope of recovering?"

"That's the impression I meant to convey. I've got a little over four months—though I don't see that I'm any weaker than I was when the doctor said I had six months. Those four will take me all through the fall and the early winter. And I hope you won't feel that you've been imposed upon—to have a dying man on your hands."

"It isn't that," Silas Lennox threw his car into gear and started up the long grade. And he drove clear to the top of it and into another glen before he spoke again. Then he pointed to what looked to Dan like a brown streak that melted into the thick brush. "That was a deer," he said slowly. "Just a glimpse, but your grandfather could have put him between the eyes. Most like as not, though, he'd have let him go. He never killed except when he needed meat. But that—as you say—isn't the impression I'm trying to convey."

He seemed to be groping for words.

"What is it, Mr. Lennox?" Dan asked.

"Instead of being sorry, I'm mighty glad you've come," Lennox told him. "It's not that I expect you to be like your grandfather. You haven't had his chance. But it's always the way of true men, the world over, to come back to their own kind to die. That deer we just saw—he's your people, and so are all these ranchers that grub their lives out of the forests—they are your people, too. And you couldn't have pleased the old man's old friends any better, or done more for his memory, than to come back to his own land for your last days."

The words were strange, yet Dan intuitively understood. It was as if a prodigal son had returned at last, and although his birthright was squandered and he came only to die, the people of his home would give him kindness and forgiveness, even though they could not give him their respect.

CHAPTER III.

The Lennox home was a typical mountain ranch-house—square, solid, comforting in storm and wind. Bill was out to the gate when the car drove up. He was a son of his father, a strong man in body and personality. He too had heard of the elder Failing, and he opened his eyes when he saw the slender youth that was his grandson. And he led the way into the white-walled living room.

"You must be chilly and worn out from the long ride," Lennox suggested quietly. He spoke in the tone a strong man invariably uses toward an invalid. Dan felt a curious resentment at the words.

"I'm not cold," he said. "It's hardly dark yet. I'd sooner go outdoors and look around."

The elder man regarded him curiously, perhaps with the faintest glimmer of admiration. "You'd better wait

"You'd Better Wait Till Tomorrow, Dan."

till tomorrow, Dan," he replied. "Bill will have supper soon, anyway. You don't want to overdo too much, right at first."

"But, good heavens! I'm not going to try to spare myself while I'm here. It's too late for that."

"Of course—but sit down now, anyway. I'm sorry that Snowbird isn't here."

"Snowbird is—"

"My daughter. My boy, she can make a biscuit! That's not her name, of course, but we've always called her that. She got tired of keeping house for us in working this summer. Poor Bill has to keep house for her, and no wonder he's eager to take the stock down to the lower levels. I only wish he hadn't brought 'em up this spring at all. I've lost dozens from the coyotes."

"But a coyote can't kill cattle—"

"It can if it has hydrophobia, a common thing in the varmints this time of year. But as I say, Bill will take the stock down next season, and then Snowbird's work will be through, and she'll come back here."

"Then she's down in the valley?"

"Far from it. She's a mountain girl, if one ever lived. Perhaps you don't know the recent policy of the forest service to hire women when they can be obtained. It was a policy started in war times and kept up now because it is economical and efficient. She did a girl from college have a cabin not five miles from here on old Bald mountain, and they're doing lookout duty."

Dan wondered intensely what lookout duty might be. "You see, Dan," Lennox said in explanation, "the government loses thousands of dollars every year by forest fire. A fire can be stopped easily if it is seen soon after it starts. But let it burn awhile, in this dry season, and it's a terror—a wall of flame that races through the forests and can hardly be stopped. And maybe you don't realize how enormous this region is—literally hundreds of miles across. We're the last outpost—there are four cabins, if you can find them, in the first seventy miles back to town. So they have to put lookouts on the high points, and now they're coming to the use of airplanes so they can keep even a better watch. Snowbird and a girl friend from college got jobs this summer as lookouts—all through the forest service they are hiring women for the work. They are more vigilant than men, less inclined to take chances, and work cheaper. These two girls have a cabin near a spring, and they cook their own food, and are making what is big wages in the mountains. I'm rather hoping she'll drop over for a few minutes tonight."

"Good Lord—does she travel over these hills in the darkness?"

The mountaineer laughed—delighted sound that came somewhat curiously from the bearded lips of the stern, dark man. "Dan, I'll swear she's afraid of nothing that walks the face of the earth—and it isn't because she hasn't had experience either. She's a dead shot with a pistol, for one thing. She's physically strong, and every muscle is hard as nails. She used to have Shag, too—the best dog in all these mountains. She's a mountain girl, I tell you; whoever wins her has got to be able to tame her!" The mountaineer laughed again.

The call to supper came then, and Dan got his first sight of mountain food. There were potatoes, newly dug, mountain vegetables that were crisp and cold, a steak of peculiar shape, and a great bowl of purple berries to be eaten with sugar and cream. Dan's appetite was not as a rule particularly good. But evidently the long ride had affected him. He simply didn't have the moral courage to refuse when the elder Lennox heaped his plate.

"Good heavens, I can't eat all that," he said, as it was passed to him. But the others laughed and told him to take heart.

He took heart. It was a singular thing, but at that first bite his sudden confidence in his gustatory ability almost overwhelmed him. So he cut himself a slice of the tender meat—fully half as generous as the bites that Bill was consuming across the table. And its first flavor simply filled him with delight.

"What is this meat?" he asked. "I've certainly tasted it before."

"I'll bet a few dollars that you haven't, if you've lived all your life in the Middle West," Lennox answered. "Maybe you've got what the scientists call an inherited memory of it. It's the kind of meat your grandfather used to live on—venison."

Soon after dinner Lennox led him out of the house for his first glimpse of the hills in the darkness.

They walked together out to the gate, across the first of the wide pastures where, at certain seasons, Lennox kept his cattle; and at last they came out upon the tree-covered ridge. The moon was just rising. They could see it casting a curious glint over the very tips of the pines. But it couldn't get down between them. They stood too close, too tall and thick for that. And for a moment, Dan's only sensation was one of silence.

"You have to stand still a moment, to really know anything," Lennox told him.

They both stood still. Dan was as motionless as that day in the park, long weeks before, when the squirrel had climbed on his shoulder. The first effect was a sensation that the silence was decaying around them. It was not really true. It was simply that he had become aware of the little continuous sounds of which usually he was unconscious, and they tended to accentuate the hush of the night. He knew, just as all mountaineers know, that the wilderness about him was stirring and pulsing with life. Some of the sounds were quite clear—an occasional stir of a pebble or the crack of a twig, and some, like the faintest twitching of leaves in the brush not ten feet distant, could only be guessed at.

"What is making the sounds?" he asked.

He didn't know it, at the time, but Lennox turned quickly toward him. It wasn't that the question had surprised the mountaineer. Rather it was the tone in which Dan had spoken. It was perfectly cool, perfectly self-contained.

"The one right close is a chipmunk. I don't know what the others are; no one ever does know. Perhaps ground squirrels, or rabbits, or birds, and maybe one of those harmless old black bears who is curious about the house. And tell me—can you smell anything—"

"Good Lord, Lennox! I can smell all kinds of things."

"I'm glad. Some men can't. No one can enjoy the woods if he can't smell. Part of the smells are of flowers, and part of balsam, and God only knows what the others are. They are just the wilderness—"

Dan could not only perceive the smells and sounds, but he felt that they were leaving an imprint on the very fiber of his soul. He knew one thing. He knew he could never forget this first introduction to the mountain night. The whole scene moved him in strange, deep ways in which he had never been stirred before; it left him exultant and, in deep wells of his nature far below the usual currents of excitement, a little excited too.

Then both of them were startled out of their reflections by the clear, unmistakable sound of footsteps on the ridge. Both of them turned, and Lennox laughed softly in the darkness. "My daughter," he said. "I knew she wouldn't be afraid to come."

Dan could see only Snowbird's outline at first, just her shadow against the moonlit hillside. His glasses were none too good at long range. And possibly, when she came within range, the first thing that he noticed about her was her stride. The girls he knew didn't walk in quite that free, strong way. She took almost a man-size step; and yet it was curious that she did not seem ungraceful. Dan had a distinct impression that she was floating down to him on the moonlight. She seemed to come with such unutterable smoothness. And then he heard her call lightly through the darkness.

The sound gave him a distinct sense of surprise. Some way, he hadn't associated a voice like this with a mountain girl; he had supposed that there would be so many harshening influences in this wild place. Yet the tone was as clear and full as a trained singer's. It was not a high voice; and yet it seemed simply brimming, as a cup brims with wine, with the rapture of life. It was a self-confident voice too, wholly unaffected and sincere, and wholly without embarrassment.

GET IT AT WALLACE'S

TORTURED BY TERRIBLE ECZEMA

Suffered Many Years Until She Tried "FRUIT-A-TIVES"

MME. PETER LAMARRE

Pointe St. Pierre, P. Q.

"I think it my duty to tell you how much your medicine has done for me.

"I suffered for three years with terrible Eczema. I consulted several doctors and they did not do me any good.

Then, I used one box of *'Sootha-Salva'* and two boxes of *'Fruit-a-tives'* and my hands are now clear. The pain is gone and there has been no return. I think it is a marvellous cure because no other medicine did me any good and I tried all the remedies I ever heard of, without benefit until I used *'Sootha-Salva'* and *'Fruit-a-tives'*

'Fruit-a-tives' cooled the blood and removed the cause of the disease, and *'Sootha-Salva'* completed the cure."

Dame PETER LAMARRE (Gls).

60c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

Then she came close, and Dan saw the moonlight on her face. And so it came about, whether in dreams or wakefulness, he could see nothing else for many hours to come.

The girl who stood in the moonlight had health. She was simply vibrant with health. It brought a light to her eyes, and a color to her cheeks, and life and shimmer to her moonlit hair. It brought curves to her body, and strength and firmness to her limbs, and the grace of a deer to her carriage. Whether she had regular features or not Dan would have been unable to state. He didn't even notice. They weren't important when health was present. Yet there was nothing of the coarse or bold or voluptuous about her. She was just a slender girl, perhaps twenty years of age, and weighing even less than the figure occasionally to be read in the health magazines for girls of her height. And she was fresh and cool beyond all words to tell.

And Dan had no delusions about her attitude toward him. For a long instant she turned her keen, young eyes to his white, thin face; and at once it became redundantly evident that beyond a few stilish speculations she felt no interest in him. After a single moment of rather strained, polite conversation with Dan—just enough to satisfy her idea of the conventions—she began a thrilling girlish tale to her father. And she was still telling it when they reached the house.

Dan held a chair for her in front of the fireplace, and she took it with entire naturalness. He was careful to put it where the firelight was at its height. He wanted to see its effect on the flushed cheeks, the soft dark hair. And then, standing in the shadows, he

Standing in the Shadows, He Simply Watched Her.

simply watched her. With the eye of an artist he delighted in her gestures, her rippling enthusiasm, her utter irrepressible girlishness that all of time had not years enough to kill.

Bill stood watching her, his hands deep in his pockets, evidently in a companion of the best. Her father gazed at her with amused tolerance. And Dan—he didn't know in just what way he did look at her. And he didn't have time to decide. In less than fifteen minutes, and wholly without warning, she sprang up from her chair and started toward the door.

"Good Lord!" Dan breathed. "It you make such sudden motions as that I'll have heart failure. Where are you going now?"

"Back to my watch," she answered, her tone wholly lacking the personal note which men have learned to expect in the voices of women. And an instant later the three of them saw her retreating shadow as she vanished among the pines.

Dan had to be helped to bed. The long ride had been too hard on his shattered lungs; and nerves and body collapsed an instant after the door was closed behind the departing girl. He laughed weakly and begged their pardon; and the two men were really very gentle. They told him it was their own fault for permitting him to overdo. Lennox himself blew out the candle in the big, cold bedroom.

Dan saw the door close behind him, and he had an instant's glimpse of the long sweep of moonlit ridge that stretched beneath the window. Then, all at once, seemingly without warning, it simply blinked out. Not until the next morning did he really know why. Insomnia was an old acquaintance of Dan's, and he had expected to have some trouble in getting to sleep. His only real trouble was waking up again when Lennox called him to breakfast. He couldn't believe that the light at his window shade was really that of morning.

"Good Heavens!" his host exploded. "You sleep the sleep of the just."

Dan was about to tell him that on the contrary he was a very nervous sleeper, but he thought better of it. Something had smiled him repeal of insomnia. The next instant he even forgot to wonder about it in the realization that his tired body had been wonderfully refreshed. He had no dread now of the long tramp up the ridge that his host had planned.

But first came target practice. In Dan's baggage he had a certain very plain but serviceable sporting rifle of about thirty-forty caliber—a gun in the information department of the large sporting-goods store in Gitchespolis had recommended for his purpose. Except for the few moments in the store, Dan had never held a gun in his hands. The first shot he hit the trunk of a five-foot pine at thirty paces.

"But I couldn't very well have missed it!" he replied to Lennox's cheer. "You see, I aimed at the middle—but I just grazed the edge."

The second shot was not so good, missing the tree altogether. And it was a singular thing that he aimed longer and tried harder on this shot than on the first. The third time he tried still harder, and made by far the worst shot of all.

"What's the matter?" he demanded, "I'm getting worse all the time."

Lennox didn't know for sure. But he made a long guess. "It might be beginner's luck," he said. "but I'm inclined to think you're trying too hard. Take it easier—depend more on your instincts."

Dan's reply was to lift the rifle lightly to his shoulder, glance quickly along the trigger and fire. The bullet struck within one inch of the center of the pine.

For a long second Lennox gazed at him in open-mouthed astonishment. "My stars, boy!" he cried at last. "Was I mistaken in thinking you were a born tenderfoot—after all? Can it be that a little of your old grandfather's skill has been passed down to you? But you can't do it again."

But Dan did do it again. If anything, the bullet was a little nearer the center. And then he aimed at a more distant tree.

But the hammer snapped down ineffectively on the breech. He turned with a look of question.

"Your gun only holds five shots," Lennox explained. Refeolding, Dan tried a more difficult target—a trunk almost one hundred yards distant. Of course it would have been only child's play to an experienced hunter; but to a tenderfoot it was a difficult mark indeed. Twice out of four shots Dan hit the tree trunk, and one of his two hits was practically a bull's-eye. His two misses were the result of the same mistake he had made before—attempting to hold his aim too long.

* * * * * *

Dan and Lennox started together up the long slope of the ridge. Dan alone armed; Lennox went with him solely as a guide. They were soon out of sight, and it might be that Dan would want to procure one of these creatures.

"But I'm not sure I want to hunt deer," Dan told him. "You speak of them being beautiful—"

"They are beautiful and your grandfather would never hunt them, either, except for meat. But maybe you'll change your mind when you see a buck. Besides, we might run into a lynx or a panther. But not very likely, without dogs."

They trudged up, over the carpet of pine needles. They fought their way through a thicket of huckleberry. They saw the gray squirrels in the tree tops. And before Lennox had as much as supposed they were near the haunts of big game, a yearling doe sprang up from its bed in the thickets.

For an instant she stood motionless, presenting a perfect target. It was evident that she had heard the sound of the approaching hunters, but had not as yet located or identified them with her keen senses. Then she swung and whirled to find Dan standing very still, peering along the barrel of his rifle. But he didn't shoot. The deer, seeing Lennox move, leaned into her terror-pace—the long, graceful lope that is one of the fastest gaits in the whole animal world. In the wink of an eye she was out of sight.

"Why didn't you shoot?" Lennox demanded.

"Shoot? It was a doe, wasn't it?"

"Good Lord, of course it was a doe! But there are game laws that go back this far, Besides—you aimed at it."

"I aimed just to see if I could catch it through my sights. And I could. My sights seem to be made it blue—but I think—perhaps—that I could have shot it. But I'm not going to kill does. There must be some reason for the game laws, or they wouldn't exist."

"You're a funny one. Come three thousand miles to hunt and then pass up the first deer you see. You could almost have been your grandfather, to have done that. He thought killing deer needlessly was almost as bad as killing a man. They are beautiful things, aren't they?"

Dan answered him with startling emphasis. But the look that he wore said more than his words.

They trudged on, and Lennox grew thoughtful. He was recalling the picture that he had seen when he had whirled to look at Dan, immediately after the deer had leaped from its bed. It puzzled him a little. He had turned to find the younger man in a perfect posture to shoot, his feet placed in exactly the position that years of experience had taught Lennox was correct; and withal, absolutely motionless. What many hunters take years to learn, Dan had seemed to know by instinct. Could it be, after all, that this slender weakling, even now bowed down with a terrible malady, had inherited the true frontiersman's instincts of his ancestors?

The result of this thought was at least to hover in the near vicinity of a certain conclusion. That conclusion was that at least a few of the characteristics of his grandfather had been passed down to Dan. It meant that possibly, if time remained, he would not turn out such a weakling, after all. Of course his courage, his nerve, had yet to be tested; but the fact remained that long generations of frontiersmen ancestors had left this influence upon him. The wild was calling to him, wakening instincts long smothered in cities, but sure and true as ever. It was the beginning of regeneration. Voices of the long past were speaking to him, and the Failings once more had begun to run true to form. Inherited tendencies were in a moment changing this weak, diseased youth into a frontiersman and wilderness inhabitant such as his ancestors had been before him.

They were slipping along over the pine needles, their eyes intent on the trail ahead. And then Lennox saw the curious thing. He beheld Dan suddenly stop in the trail and turn his eyes toward a heavy thicket that lay perhaps one hundred yards to their right. For an instant he looked almost like a wild creature himself. His head was lowered, as if he were listening. His muscles were set and ready.

Lennox had prided himself that he had retained all the powers of his five senses, and that few men in the mountains had keener ears than he. Yet it was truth that at first he only knew the silence, and the stir and pulse of his own blood. And assumed then that Dan was watching something that from his position, twenty feet behind, he could not see. He tried to probe the thickets with his eyes.

Then Dan whispered. Ever so soft a sound, but yet distinct in the silence. "There's something living in that thicket."

Then Lennox heard it, too. As they stood still, the sound became ever clearer and more pronounced. Some living creature was advancing toward them; and twigs were cracking beneath its feet. The sounds were rather subdued, and yet, as the animal approached, both of them instinctively knew that they were extremely loud for the usual footsteps of any of the wild creatures.

"What is it?" Dan asked quietly.

Lennox was so intrigued by the sounds that he was not even observant of the peculiar, subdued quality in Dan's voice. Otherwise, he would have wondered at it. "I'm free to confess I don't know," he said. "It's booming right toward us, like most animals don't care to do. Of course it may be a human being. You must watch out for that."

They waited. The sound ended.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

In Use For Over 30 Years

THE CENTAUR COMPANY, NEW YORK CITY

"There's Something Living in That Thicket."

They stood straining for a long moment without speech.

"That was the dumdest thing!" Lennox went on. "Of course it might have been a bear—you never know what they're going to do. It might have got sight of us and turned off. But I can't believe that it was just a deer—"

But then his words chopped squarely off in his throat. The plodding advance commenced again. And the next instant a gray form revealed itself at the edge of the thicket.

It was Graycoat the coyote, half-blind with his madness, and desperate in his agony.

There was no more deadly thing in all the hills than he. Even the bite of a rattlesnake would have been welcomed beside his. He stood a long instant, and all his instincts and reflexes that would have ordinarily made him flee in abject terror were thwarted and twisted by the fever of his madness. He stared a moment at the two figures, and his red eyes could not interpret them. They were simply foes, for it was true that when this racking agony was upon him, even lifeless trees seemed foes sometimes. He seemed eerie and unreal as he gazed at them out of his burning eyes; and the white foam gathered at his fangs. And then, wholly without warning, he charged down at them.

He came with unbelievable speed. The elder Lennox cried once in warning and cursed himself for venturing forth on the ridge without a gun. He was fully twenty feet distant from Dan; yet he saw in an instant his only course. This was no time to trust their lives to the marksmanship of an amateur. He sprang toward Dan, intending to wrench the weapon from his hand.

To be continued.

Reduce the Cost of Selling
—*Use Long Distance*

THINK of Long Distance in terms of time and money saved. "Use the 'Bell' to Sell." It is today the most effective form of approach to customers. Your personality, the convincing tones of your voice, will bring results when everything else fails.

"Many of our Long Distance calls are now Station-to-Station calls"—writes a subscriber. "We notified our customers that two of our most available men had been designated to look after Long Distance business. As soon as Long Distance calls, our Private Branch Exchange operator switches the call instantly to one of these men, which gives our client the advantage of Station-to-Station rates.

"Increasing the efficiency of a sales force ten per-cent is well worth while. Our Sales Manager calls upon our travellers by Long Distance, or they call him. He encourages them, advises them, helps them to secure orders. If competition has taken he learns of it in time to meet it."

Every Bell Telephone is a Long Distance Station

BEST TYPE OF ROOTS

EXPERIMENTS WITH VEGETABLES IN CANADA.

No Hard and Fast Rules Can Be Laid Down, as Some Varieties Do Well In One Part of Dominion But Not In Another—Still, a Few Recommendations Are Made.

Ever since the experimental farms system was inaugurated, experiments with field root varieties have been conducted on a large scale. An analysis of the results of these, mostly during a large number of years is rather interesting. In the first place, it shows that it is impossible to draw any reliable conclusions from a few years' results only, a practice which unfortunately is often followed.

Secondly, they show that, seen from the standpoint of nutritive value, it does not necessarily follow that the varieties yielding the heaviest crop per acre are really producing the largest amount of food constituents per acre. Thus, there are varieties which regularly may be found to heavy yielders but which on account of a comparatively low dry matter content, may produce less actual food per acre than varieties which are yielding smaller tonnages.

Finally, the results of the experiments have demonstrated that although a variety may be found normally to be excellent in a certain part of the Dominion, it does not follow that it is equally as good, or even desirable at all, in other parts where climatic conditions are different. This is especially noticeable in certain mangel and Swede turnip varieties characterized by a small tap as are a large number of the varieties developed on the European continent. These varieties may give heavy returns under conditions of planting of the rows close together, say 18 to 20 inches, and they may also give heavy yields in districts where the moisture supply is abundant and the summer moderately hot.

With wider planting between the rows and in districts where less or no prolonged dry periods normally occur, small-topped varieties are somewhat unreliable for the reason that the small foliage leaves placed between the rows exposed to the drying out and heating of the sun. This condition of affairs may cause the leaves to wilt and die off, which in turn may prevent crop from growing normally. Under these circumstances, tankard varieties are to be preferred, especially in the interior sections of Canada; in the Maritime Provinces and on the Pacific Coast, small-topped varieties do equally well somewhat unreliable for the reason that the small foliage leaves placed between the rows exposed to the drying out and heating of the sun. This condition of affairs may cause the leaves to wilt and die off, which in turn may prevent crop from growing normally. Under these circumstances, tankard varieties are to be preferred, especially in the interior sections of Canada; in the Maritime Provinces and on the Pacific Coast, small-topped varieties do equally well as the European continent and to some extent in the country known as Ontario to advantage.

Regarding the shape of the various varieties as to be preferred, experience has been that those of medium length or even short tankard shape generally give the best satisfaction. They are easier and therefore cheaper to pull and can be brought to storage in a physically better condition than very long and deep rooted.

According to our experience we would particularly recommend for Ontario in general: Mangels, yellow globe type and sugar mangels; turnips, round and oval purple top varieties; carrots, medium length and yellow varieties.—Canada, Dominion Agrostologist.

KEEP CALVES GROWING.

They Are Once Stunted They Never Recover.

It is a well known fact that capacity is one of the essentials of a good cow and in order to develop the characteristic the calf must be growing from the very beginning. A stunted calf will never recover from the handicap. The calf must be induced to begin eating grain and hay at as early a date as possible and there should always be an abundance of the hay accessible. The change develops capacity in the digestive organs—an item of importance—as the amount of feed that a cow will consume depends largely upon the development of these organs.

Heifers should not be bred too young, the age depending upon the breed to which they belong as well as the development of the individual. Holstein heifers should not be bred to freshen before they are 24 months old, as a rule, and a great many would do better if given 26 or 28 months. Heifers should be in good condition at time of freshening, although not fat from an excessive carbohydrate ration. After freshening, they should be worked up to full feed very gradually, feeding all the roughage they care to consume without waste; alfalfa or clover hay fed in connection with silage or roots being a very good combination.

The grain should be light in character to begin with and gradually changed to a mixture of grains that will supplement the roughage; 300 pounds ground oats, 300 pounds ground corn, 100 pounds wheat bran and 100 pounds gluten feed being a good combination to go with the roughage mentioned above. The grain can be increased a fraction of a pound a day so long as there is an increase in the milk flow, but as soon as there is no response to the increase it must be cut down until there is a falling off in the milk flow and then the increase may be begun again. When on full feed they will be consuming about one pound of grain to every 3½ pounds of milk produced.

In the absence of silage roots, dried beet pulp may be used, but if none of these are available or are too high in price, oilmeal can be used in the grain mixture to advantage. In the absence of silage and roots, the cows will consume a large quantity of alfalfa. Sometimes it is advisable to chaff and moisten a portion of it when fed under these conditions.

Perches In Chicken Houses.

When making readjustments in the poultry houses it is always well to look over the perches and see if they meet the requirements of the birds. If fowls are of the heavy, large breeds the perches should not be as high, for many ill effects are the result of jumping from high perches. The lighter weight fowls are usually better flyers and can assist themselves in getting up and down much better than can the heavy breeds. The two kinds should never be kept in the same house at night if for no other reason than the above. The height of the perches also brings trouble if every one is not on the same level. In endeavoring to secure the safest place in the house all fowls will try to reach the highest perch and the lower ones are practically useless except to the ones that could not fight their way higher.

Always aim to have the perches at the same height and have room enough on them to avoid crowding. There are dangers in crowding the hens at night, to say nothing of this discomfort. No hen likes to be uncomfortable, nor does any animal, in fact, and if we make domestic fowls of the hens we must give them the privileges and liberties, as nearly as we can, resembling that of their natural state.

High jumping from the roosts is likely to injure the legs of the hens, and if the birds have not attained their growth they will be more liable to deformities. It is the natural instinct of the fowls to go to roost high, away, as they suppose, from their enemies, as they do in the wild state; and while rats should not be permitted to infest the houses there is less danger from them when the fowls are high up. Then, too, the little streams of air (that should not be allowed to flow in on the hens) will do less damage if the roosts are not too low. While very high roosts are disapproved of it is, nevertheless, advantageous to have them high enough so that the birds may feel safe and at the same time have them on the level for the whole flock that inhabits the one house.

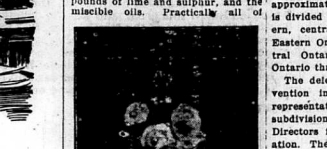
SPRAYS FOR SCALE PEST.

Insect at One Time Threatened Fruit Industry of Whole Continent.

A large percentage of all the home orchards and commercial orchards are more or less infected by the San Jose scale. At one time this scale threatened the fruit industry of the entire continent, but sprays were soon found by which is could be controlled.

One experiment station has tested a large number of the proprietary brands of mixtures recommended for this purpose, as well as a number of home-made formulas.

The most common of the proprietary articles are the various compounds of lime and sulphur, and the miscible oils. Practically all of



Peach Tree Injured by San Jose Scale.

those put out by responsible companies are effective if applied according to directions sent out by the manufacturers.

One of the common home-made lime-sulphur mixtures may be made by the following formula:

Flowers of sulphur	16 lbs.
Stone (unslaked) lime	14 lbs.
Water	50 lbs.

The sulphur is run through a piece of fly screen so as to rid it of lumps. It is then made into a thin soupy paste by adding water slowly and stirring. The lime is next put in and more water added, and the mixture stirred slowly, as the lime slakes. Following this, about ten gallons of water is added and the mixture boiled from 30 minutes to one hour. It is then made up to 50 gallons, with warm water, and sprayed on at once while warm.

The San Jose scale is so resistant to sprays that any spray strong enough to kill it will destroy the foliage of the tree if applied during the summer. We therefore have to spray against the San Jose scale during the dormant season.

Where the trees are badly infested two sprayings should be given—the first soon after the trees are made dormant in the fall, and the second just before growth starts in the spring. Much time and material is saved in the spraying if the trees are pruned before the spraying is done.

Rules for Transplanting.

There are few general rules with regard to transplanting that must be followed if the work is to turn out a success. In the first place, roots of plants must be kept from drying out in the time between their lifting and resetting. This indicates moving the plants directly from the old position to the new, so far as possible, and, if circumstances enforce loss of time, that protection must be provided against sun and air. Where the plant is of succulent nature such protection should be provided for the entire plant, but in any case the roots should be thoroughly and kept moist as far as possible. Nursery stock of orchard trees should be heeled in as soon as received and unpacked, unless final planting can be done immediately; while plants such as strawberries will take hold better in the open ground if their roots are given a mud bath before planting takes place.

Another practice of importance to the satisfactory replacement and life of the plant is that of pruning both root and branch. The purpose of this trimming or pruning is to conserve the strength of the plant by preventing a right proportion of top to root so as to prevent undue demands on the plant food taken up by the roots. With plant bed seedlings the same method is to cut away a part of the top of the plant with a knife or shears; and the same practice is followed with trees and bush fruits. Strawberry plants that have developed a considerable amount of top may with advantage be reduced to two sets of leaves and growth starts better if the roots are cut back from one-fourth to one-third of the total length. With all plants a certain amount of root pruning is desirable, but it is a good rule to leave a big proportion of root to top, in every case.

"Scrub" Pure-bred Is Enemy.

Pure-bred bulls are not always of pure-bred character. They may sometimes be of poor quality. Then too, a pure-bred cannot be treated like a scrub and expected to produce offspring of high quality. These occasional scrub-quality pure-breds are the greatest hindrance to dairy progress. The "scrub" pure-bred must be culled out; they are even worse than "scrub" scrubs because they are parading under false pretences. The "scrub" pure-bred is a secret enemy; the "scrub" scrub is an open one.

To Improve Cows.

As practical evidence of their interest in the "Better Sires — Better Stock" campaign, one dairy farming recruits rapidly in a majority of the states, the owners of a large stock farm in Florida have written the Bureau of Animal Industry that the Holstein bull and Hampshire boar owned by them have been made free community sires. The services of a Duroc boar will likewise be made free as soon as he is old enough. All are fine animals, with pedigrees.

"We give the services of these animals free," write the owners, "because this region is cursed with scrub sires. They roam everywhere at will and are a great menace to thoroughbreds. Pure-bred stock. Please tell us what to do to have our farms enrolled in your campaign and our sires recorded."

The offer of the bull will be made with the desire to improve the milking qualities of cows. The owners of the bull specify that all cows brought for service must be tick-free. A fee is charged for service to registered Holstein cows.

WOMEN'S INSTITUTES

How Organized and Conducted in This Province.

Over 900 Branches With 30,000 Members — Three Annual Conventions — Some Outstanding Varieties of Field Crops—Fruit For the Farm.

(National Crop Improvement Service.) Agriculture, Toronto.)

In Ontario there are 816 branch Institutes, with a membership of approximately 30,000. The province is divided into three divisions, eastern, central and western Ontario. Eastern Ontario contains three, central Ontario eleven, and western Ontario three subdivisions.

The delegates to the annual convention in each division name a representative from their respective subdivision to form a Board of Directors for the Provincial Federation. These directors, from among themselves, elect officers on the executive, and also name representatives to the Dominion Federation.

The principle and designation of the standing committees and the system of holding and financing their meetings is provided for in the constitution of the provincial organization and the following committees have been named: Health, Education and Better Schools; Immigration, Agriculture, Legislation, Home Economics and Publicity.

Annual conventions are held at Ottawa, London and Toronto; plans for the same being made in co-operation with representatives of the provincial committee and local committees chosen at the time of the conventions.

The Institutes are entirely independent of the Department, so far as their local meetings are concerned. The provincial organization is also quite independent of the department, but it is utilized in an advisory capacity. The superintendent of Institutes suggests lines of work for the Institutes from time to time, and places before them reports of what the Institutes are doing in various sections of the province, as well as other sections of the Dominions. The Department furnishes lecturers for single meetings, and lecturers for short courses as outlined in circular No. 18.

The membership fee of twenty-five cents per member is wholly used for local purposes. The Government grant is $3 to each branch having a membership of fifteen and holding at least six meetings a year and furnishing the reports asked for by the Department, including a list of members, their standing, and the brief reports of meetings. A grant of $10 is also given to the district organization, with an addition of $1 on account of each branch in the district which makes a satisfactory report.—Geo. A. Putnam, Superintendent, Farmers' Institutes, Toronto.

Some Outstanding Varieties of Field Crops.

Rye.—Of the spring varieties of rye, the O.A.C. No. 61 has not only given the highest average yield of grain per acre at the college but has surpassed the common spring rye in the co-operative experiments throughout Ontario in each of the past nine years, the average being practically three bushels per acre in favor of the former.

Field Peas.—The Canadian Beauty variety of field peas is one of the best of the large, smooth, white field peas. At the Dominion Field Central Experimental Farm at Ottawa, is coming into prominence. It is a medium late white pea of medium size. The Golden Vine is a small white field pea and one of the most suitable for mixing with oats in the production of green fodder or of hay by using one bushel of peas and two bushels of oats per acre. The Golden Vine peas and the O.A.C. No. 72 oats make an admirable combination.

Field Beans.—The Small White pea bean is the commercial variety of Ontario and is one which is grown extensively. The Pearce's Improved Tree bean is a medium late large yielding variety, producing large sized white beans of excellent quality. This variety has given excellent results in some localities.

Buckwheat.—The Silver Hull buckwheat produces a grain of excellent quality and is used considerably throughout the province. The Japanese buckwheat is also well known but it is an exceedingly heavy yielder producing about fifty per cent. larger yield of grain per acre than the Silver Hull. Although the last named variety is a high yielder, the grain possesses a thick hull and is not of an attractive appearance.—C. A. Zavitz, Professor of Field Husbandry, O. A. College, Guelph.

Dairying in June.

Cows in clover or good June-grass pasture require very little attention. This is the ideal month for dairy operations. More milk and better milk, are produced in the month of June, than at any other time of the year, in Ontario. If there are any hot days, be careful to cool both milk and cream, by setting in ice water, or cold well water. Warm milk and cream are too frequently sent to the factory. Don't forget to wash the cream separator and strainer daily, or after each time of using.

Helping the Pig Crop.

There were recorded by the Canadian Swine Breeders' Association, on December 31, 1920, the pedigrees of 77,593 Yorkshire swine in Canada, of which probably half were sows. Since grade Yorkshires must number somewhere near the pure-breds, one would have to use a pencil to figure out the possible increase in the hog population of Canada in a year if every sow gave birth to 23 pigs in one litter, as did a grade Yorkshire, owned by W. H. Walford, of West Hill, Ont., early recently. It will be interesting to know how many of the young pigs reach maturity, or at least bacon age.

Practical Utility Breeding.

Breeding for practical utility should be the aim of the farm poultry keeper, regardless of whether the flock is kept for the production of meat and eggs or with a view to sales of breeding stock.

THAT SUDDEN Sharp Pain

which you experience at times can be removed. No woman has the right to suffer when she can obtain relief safely, certainly and promptly. Suppose you **have headaches, backaches, extreme nervousness, low spirits and general good-for-nothing feelings at times?** Your case is not hopeless. Try Doctor Pierce's Favorite Prescription. Sold by druggists in liquid or tablets, or send 10c. to Dr. Pierce's Invalids' Hotel in Buffalo, N.Y., for a trial package.

Read what this woman says:

LONDON, ONT.—"In my early married life I was very frail and delicate. I was feeling exceedingly weak and miserable when a friend advised me to take a bottle of Dr. Pierce's Favorite Prescription. From the very start I felt new strength and vitality. I am always grateful for what Dr. Pierce's Favorite Prescription has done for me and will always be pleased to recommend it."—Mrs. JOSIE DANBY, 139 Ann Street.

TOBACCO SEED BEDS.

Steam Provides Best Control of Root-rot and Damping Off.

It is generally admitted that most of the tobacco diseases originate in the seed-bed. It is therefore in the seed-bed that the first preventive and control measure should be taken in order to avoid loss later, during the growing season.

Damping off and root-rot are the two most serious seed-bed diseases experienced in this country.

The safest way to destroy the germs of these diseases, says F. Charian, chief officer, Tobacco Division, is to sterilize the seed-beds by steam. This can be done either during the previous fall or during the spring, providing sufficient lapse of time is left between the end of the treatment and the date of sowing. The most effective way is to use steam at a pressure of 100 to 150 pounds, at a temperature of about 230 to 240 degrees Fahrenheit, applying it for at least half an hour on the beds to be sterilized.

This is done by placing on the surface of the bed an inverted pan. The width of which is the same as that of the seed-bed and from eight to ten fet long, under which the steam is admitted through a hose connecting with the boiler.

The length of the treatment depends upon the nature of the soil to be disinfected and the pressure obtained. If the soil is particularly compact, the treatment should last an hour if the pressure should drop rapidly to 120 pounds. In order to obtain good results, the soil should be treated when in good condition to be sown, that is to say sufficiently moist but not too damp, and sufficiently friable.

The steam pan should be set as close as possible to the frame of the bed so as to avoid losses of the treated strip. The handles for carrying the pan should stick out as little as possible so as to permit of close contact with the frame.

It is possible to steam the beds with satisfactory results, as far as the eradiction of the disease germs is concerned, at a lower pressure. In that case, however, the steam is not as dry, and as it is necessary to maintain it longer, three-quarters of an hour at least, the expenditure is the same, if not higher, and the soil of the bed is left too wet.

As a rule the steaming on soil disinfected by steam are a little slow at the start, but they rapidly make up during the latter stage of their stand on the seed-bed.

Steam sterilization and thin seeding are safe ways to produce early and healthy seedlings.

Cut Straw Is Best Bedding.

A great deal of the liquid manure now going to waste can be saved by the use of absorbents, such as straw, sawdust, muck and loam. Cut straw is a very valuable absorbent, taking up two or three times its weight of water, while one cut straw will absorb nine times its weight of liquid. Moreover, cut straw contains quite a large amount of plantfood, especially potash.

Don't Burn Autumn Leaves.

Do not burn the shade tree leaves. Your neighbors may not enjoy being smudged, and when they are a valuable natural fertilizer. Spade or plough them into the garden, if you object to leaving them on the lawn, or use them as a mulch around the shrubbery border or compost them in a corner of the backyard for future use.

Superior Fall Vegetables.

Radish and lettuce are appreciated again, as the hot weather has made their growth difficult and their quality poor. In the fall they are as equally grown as in the spring and as good. A little frost does not hurt them, and they last over a long season. The large varieties of radishes such as the Chinese winter will make immense roots that can be stored and kept over winter.

Fresh Fruit For the Farm.

For a very small sum any farmer may have a few rows of strawberries, two or three dozen of raspberries, currants, etc., which will give fresh fruit at cheapest cost. A few grapes will also pay. Selling strawberry plants and berry canes will also bring in an odd dollar or two for the wideawake man or woman, or boy or girl.

Children Cry
FOR FLETCHER'S
CASTORIA

FOR PLUMP WOMEN

Styles of 1921 Quite in Favor of the Stout Ones.

Even Taffeta Can Be Manipulated to Fall Softly and Flatteringly Over Fleshy Figures.

While there is never a time when the woman of stout, mature lines cannot be fashionably as well as becomingly dressed, a thing that is accomplished with unusual success by certain dress designers, it can be said almost without an exception that the styles for 1921 are particularly favorable to the stout woman, states a fashion correspondent in the Philadelphia Record. Even taffeta, that sprightly fabric associated with youth and slim lines, can be manipulated to fall softly and flatteringly over fleshy figures.

Of course, it will not be in the charming little pointed basque, full-skirted, round-neck, puffed-sleeve frocks which early spring showings are featuring, but in long-waisted models with long pointed openings to the waist to show a lace vestee, or contrasting georgette, with sleeves at least three-quarter length and flowing if not flaring. The skirt may even decide to flare a bit to the sides if the flaring or draping comes low, and length is preserved back and front with soft panels of lace, georgette, or the newer lingerie touches of eyelet batiste or net. The combination of navy and gray in these taffeta frocks is very good, and especially for the large woman.

It is going to be a great temptation to the woman who is taking on flesh to wear gray this spring. Such beautiful frocks are being shown in it, in all its varying shades, but generally speaking it is not a good choice. Of course, there are exceptions. Gray is inconspicuous and in many ways looks better than a whole henna frock say, or one of jade green, but it has a tendency to give a large woman an elephantine appearance, which is never flattering. Better keep to the safe path of dark, receding colors and get your bright hues in trimmings and embroideries. There are several new things in the notebook of the mode that will help the stout woman in this direction. One is the building of a straight chemise frock, let's say in navy canton crepe, over an underdress of henna or gray crepe split to the waist to show the underdress, and the long slit in front from neck to waist doing the same thing. In this way the long straight lines are preserved in the dark material while the underdress helps much to relieve its sobriety.

DECORATIONS WORN IN HAIR

Women and Girls Do Not Venture Out at Night With Their Heads Unadorned.

No maid or matron ventures out at night with her head unadorned. Every woman wears her wreath of laurel with silver filigree or close-set rhinestone leaves. Single strands of diamonds also bind the youthful brow, while diamonds and onyx are combined for the silver-haired matron.

Topaz in a Grecian border bandeau is a favorite headdress for the slender, brown-haired woman, while an Alsatian metallic band in American beauty red is worn with matching slippers and an ivory satin robe. A wreath of fine brown paradise mounted in brilliants forms a delicate aureole for the titian-haired debutante, especially if her shoulders are wrapped in bronze tulle. Diamond butterflies flitting along a silken ribbon will hold the yellow curls of the sub-deb and all her bobbed-hair sisters are now begging for diamond-studded barrettes in their short, curled locks.

HIGH COLLAR IS FEATURED

This is a suit of nigger duvetyn embroidered in rich braid. The simplicity of line is exquisite and a note of great smartness is added by the collar.

LIKE THE OVERSKIRT BLOUSE

Stout Women Will Never Give Up Tunic—Solution of Separate Skirt and Waist Problem.

The stout woman will never give up the tunic of overskirt blouse. It is the solution of the separate skirt and waist problem for her. Few of the new blouses cannot be worn by her, but better lines result if she chooses the blouse that is slightly longer than the hip-length middy styles, as this, if it contrasts with the skirt, is apt to emphasize hip breadth when it is not wanted.

For evening the large woman is almost unlimited in her choice of gowns. The new dyed laces can be used for her providing she does not get them too fluffy-ruffly in characterless shaped effects, apron tunics and combinations with straight lines of satin will harmonize them with her figure. Thus she may choose a navy satin with an apron front and back of black net embroidered in crystal. The modest decollete is U-shaped, and while the satin remains smooth and untrimmed at the neck and shoulders, a full overblouse of the net falls to a low waistline in front, giving the satin a bolero appearance. Short sleeves are of the net, also the close-ly-folded girdle, which ties in a fluffy bow at the side.

FADS AND FANCIES

The circular tunic is new and smart. Many frocks suggest the flying panel.

The full-length surplice collar is seen.

Wraps continue to feature large collars.

The Victorian line is used in decolletage.

The foundation skirt is still quite narrow.

The newest fullness is just above the knee.

Many of the new frocks slip over the head.

Many gowns feature the full-length back panel.

Crepe de chine is used for straight tunic frocks.

Dress collars stand a little away from the neck.

Lace blouses are usually cut with kimono sleeves.

Very fashionable is the deep scallop at the hem.

Dark blue silk is very popular for the street dress.

Deep-pointed vestees have made their appearance.

Duvetyn and satin make an excellent combination.

The new neck is cut a little low at the back and side.

Paris looks with favor upon hand work of every kind.

White fur and dark velvet are combined with success.

Afternoon frocks appear as lace-over-satin creations.

Evening wraps employ large flat flowers as ornaments.

Straight-line effects are emphasized by elaborate embroideries.

The long body line has been used in many gowns and dresses.

The wide peasant sleeves are worked in gay body embroideries.

Secrets of Stonehenge.

The first stage in the "restoration" of Stonehenge is now completed, and the lonely landmark on Salisbury Plain is now free from scaffolding and cranes. A report on the work has been published by the Society of Antiquaries, whose experts have been in charge of the excavations, and the report states that many relics at the base of the monoliths, including roughly-worked flint instruments, and fragments of pottery of the bronze age and the Romano British period were discovered. At the base of the slaughter stone they found a bottle of port, left there apparently by a previous investigator. Mr. Cunnington, who examined the stone in 1901. The latest discoveries appear to bear out the theory that Stonehenge was built in the latter part of the Stone Age, between 1600 and 1800 B.C. This theory of the date was advanced by Prof. Gowland, who was in charge of the restoration of Stonehenge in 1901. He based his assumption on the fact that a large number of crude flint tools were found at the base of the stones, as if left there by workmen. No bronze implements were discovered at the time. The absence of any tools other than those of flint is again noted by the later investigators.

ANGORA SCARFS ARE LIKED

A new scarf of angora is new being shown. It is of tan color, with reverse of tan and brown check.

Empire Waistline This Spring.

There is rumor that the short, or empire, waistline will be introduced as a new spring fashion feature on dresses.

Fashion Note.

Hats are Spanish, Breton or American navy. The Paul Jones is dominant. The materials of which they are made are velvet duvetyn and silk beaver, in the order in which they are made. The duvetyn hat has all the earmarks of its success, especially when it is rust, rock and brick color. The short veil of lace is attached to the tricorne and the marquise and also worn with broad Spanish hat with a pair of earrings of jet.

GOOD EYE SIGHT

One of the greatest blessings, but so few possess it.

Thousands are wearing Smith's correctly fitted spectacles and enjoy the greatest comfort—free from headaches and eye strain.

No occasion to go out of town for your eye examinations.

All optical defects fitted at Smith's Optical Department.

Also new lenses made and all repairs on shortest notice.

Have your eyes properly fitted by

Plain Talks - No. 5

AND WE VOTED YES.

'Twas a balmy summer's evening,
And a goodly crowd was there
Such dope we got in days gone by,
But now it seems threadbare.

No more gin rickey's can we have,
Or highballs when we chose,
Since the old bartender lost his job,
We've kissed them fond adieus.

The sawdust and the polished rail
Departed with a shock ;
And Bums in back lanes whisper now,
Do you want to buy a crock ?

Dear Peoole :

No doubt you will be a little surprised at us for our fast advertising. Especial-methods of advertising, for they by our old customers. know us well, and expect something out of the ordinary. We must apologize for repitition, as business is always more than brisk at this season and calls for our efforts so urgent that we scarcely find time to eat. Now there is a reason for our success and let us briefly state we mean to stick to our ideals. Our leather and workmanship is, and always will be, of the very best, we work on a small margin and give satisfaction to all. As you are aware there are several grades of leather and it is possible to have boots fixed at very low cost, but not so with us, we handle nothing inferior in quality and are best by far, so compare our work with others and be convinced. Our prompt service is also an item worthy of mention for we do everything with neatness and dispatch. All work left in the morning can be had same evening. Some good second hand boots for sale cheap. We have the unbreakable shoe laces. Rubber heels on in a few minutes.

Coal Oil Stove Demonstration.

At Davy & Allison's Hardware, on Saturday, July 9th. Come and see the Perfection stove handled by an expert. DAVY & ALLISON.

The Gibbard Furniture Factory is closing down for two weeks, beginning Thursday.

We are pleased to note that Miss Marguerite Kouber passed her intermediate exam. in music.

On Tuesday last Mrs. Louis Meng gave a handkerchief shower for the bride of Thursday, Miss Lorenia Wilson.

Supreme Court Sittings for Lennox and Addington will open at the Court House, 15th Nov., Mr. Justice Logie presiding.

The biggest list of Special Prizes offered at any fair in Ontario, will be offered at the Napanee Fall Fair.—Are you going to compete ? 31-2

The County Council of the county of Frontenac will meet to pay the Provincial Government the County's portion of Provincial Highway expenditure, $101,000.

Mrs Fox and family wish to thank their many neighbors and friends for the many acts of kindness shown them during the illness and death of a loving husband and father, the late Thos. E. Fox.

Loyal Orange Lodge, No. 358, will attend divine service at St. Andrews Presbyterian Church, on Sunday morning next, July 3rd, at 10.30 o'clock. Members of all the Orange Lodges cordially welcomed.

Wednesday afternoon at the Driving Park, an interesting ball match will take place between Napanee and Kingston Park Nine teams. Spend your half holiday at the park and witness a good ball game.

O. E. Ashley, of Napanee, who purchased "Queen Walker Keyes" from A. D. Foster & Sons at the Belleville Holstein sale on March 29th, was given a surprise last week. The cow gave birth to twin pure-bred heifer calves and both are in perfect health and all doing fine.

Miss Glenn, of Glenn-Charles, Toronto, Canada's Hair Fashion store, will be in Napanee, Thursday, July 7th, at the Campbell House, with a full line of ladies' and gentleman's hair goods. If you are not satisfied with the appearance of your hair consult Miss Glenn, who is an authority on hair goods and individual hair styles. Free demonstration.

Frank W. Logan, Grand Trunk locomotive engineer, and member of the town council, was sitting on his verandah at Brockville, when a robin approached with a piece of green paper in his bill. This he dropped on the lawn in front of Logan. Examining it, it was found to be a dollar bill carefully folded and evidently taken by the bird from a milk bottle at some nearby house.

On Thursday last fire destroyed a large portion of the village of Northport, in Prince Edward County Eleven residences, ten barns and other outbuildings were destroyed. A blaze started in a house owned by Albert Rowe on Tuesday afternoon, and the house and barns were burned. Embers from the first fire started the second fire in the woodpile at the residence of Alexander Anderson. The loss is about $50,000.

Miss Gertrude Metzler was hostess at a delightful linen shower in honor of a bride of last week, Mrs. Ernest Edmonds, (nee Miss Lorenia Wilson). The rooms were tastefully decorated in pink and the bride was entangled amid numerous yards of white satin ribbon leading to her gifts, causing much merriment. The dining room, where tea was served, was a study in pink roses, tulle, and ribbon. Refreshments were carried out in corresponding color. After appropriate music and an affectionate response by the bride, she was once more showered with choicest wishes for merited happiness.

The July number of Rod and Gun in Canada, the well known sportsmen's magazine, contains many interesting fishing stories and articles ; including "Editorial Doubters" a tale of Timagami fishing by M. Parkinson. Pisciculture, by Leo Baker, describes the culture of game fishes at one of the fifteen government hatcheries. The hunter is well looked after in this issue with interesting accounts of hunting trips in Ontario and British Columbia. For the lover of firearms, there is Guns and Ammunition department, conducted by C. S. Landis. The well known nature writers, Bonnycastle Dale, F. V. Williams and Robert Page Lincoln are represented in this issue. Rod and Gun in Canada is published monthly by W. J. Taylor, Limited, at Woodstock, Ontario

Umbrellas re-covered and repaired. - Brown's Umbrella Store, 10 Campbell Street, Belleville. 31-c

Coal Oil Stoves.

New Perfection, Florence Wickless and Dominion stoves all sizes at WILSON'S HARDWARE.

Saw Mill Burned.

The saw mill at Flinton, owned by the Ore Chimney Mining Co., was destroyed by fire. About 8,000 feet of hardwood flooring, all ready for laying, went up in smoke. The loss is very serious one for the company.

How excellent is Thy loving kindness, O God.—Ps. 36-7 ; Thou will keep him in perfect peace whose mind is stayed on Thee, because he trusteth in Thee. Trust ye in the Lord forever ; for in the Lord Jehovah is everlasting strength.-Isa. 26-3-4 ; Lord what will Thou have me to do ?—Acts 9-6 ; I will fear no evil for Thou art with me.—Ps. 23-4.

O make but trial of His love ;
Experience will decide,
How blest are they and only they
Who in His love confide.

Wherever in the world I am,
In whatsoe'er estate,
I have a fellowship with hearts
To keep, and cultivate ;
And a work of lowly love to do,
For the Lord on whom I wait.

A BIBLE LOVER.

Coulter-Jackson Nuptials.

A very pretty wedding took place at the home of Mr. and Mrs. Norman Jackson, Moscow, on Wednesday at high noon, when their daughter, Beta Mae, was united in marriage to Robert Wellesley, second son of the late Mr. and Mrs. Robert Coulter, of Marlbank. Rev. A. G. Brooks, of Enterprise, performed the ceremony. Promptly to the strains of Lohengrins wedding march, played by Miss Rosena Davy, of Enterprise, the bride, who looked charming in a gown of white satin with silver lace and veil of filmy net caught with orange blossoms and carrying a bouquet of pink and white carnations with maiden hair fern, entered the parlor leaning on the arm of her father and took her place beneath an arch of evergreens and roses. She also wore the groom's gift, an onyx ring set with pearls. Miss Florence Coulter, of Napanee, sister of the groom, acted as bridesmaid and wore a dress of white Georgette and carried a bouquet of pink and white carnations with maiden hair fern. Mr. Fred Bell, cousin of the bride, ably supported the groom. The grooms gift to the bridesmaid was a gold brooch, set with pearls, to the grooms-man gold cuff links, and to the parson a fine fountain pen. After the ceremony a sumptuous wedding dinner was served, after which the happy pair left amid showers of rice and confetti, motored to Yarker and left on the 4.30 train for Toronto and other points. The bride travelled in a suit of navy blue serge with hat and veil to match. The many useful and costly gifts received show the high esteem in which the young couple are held. On their return they will reside near Moscow.

Ice Cream Freezers, hot weather necessities. DAVY & ALLISON'S.

Prices of pork and pork products are very much lower. When you want hams, breakfast bacon, side bacon, smoked rolls, picnic hams, lard or shortening, just a little better," and "just a little cheaper," give me a call.

Dominion Day and the Saturday following will be Dollar Days in Our Store--July 1st and 2nd, 1921

On Friday, July 1st., we celebrate the 54th birthday of the Dominion of Canada. At that time the men at the head of the various governments realized that if this great land was to develop and prosper, it must be united from ocean to ocean, from the boundary at the South to the regions of the North. In 1867 this great amalgamation was successfully accomplished. Canada in those days needed co-operation in her various industries. To-day one of Canada's gratest needs is business. It must have good healthy business with "work for all" and "all for work" if we are to prosper.

We know no better way to celebrate this greatest National Holiday than by giving our customers real genuine bargains on the merchandise we have here so that we may clear our shelves and be able to go into the markets for more dry goods. Read the big list of special $1.00 values. They are bigger and better than ever.

COME AND SEE WHAT A DOLLAR WILL BUY.

THE ROBINSON CO., LIMITED, NAPANEE
